Rowan Salisbury **The Wiley Handbook of Cognition and Assessment** Andre A. Rupp, Jacqueline P. Leighton, 2016-11-21 This state of the art resource brings together the most innovative scholars and thinkers in the field of testing to capture the changing conceptual, methodological and applied landscape of cognitively grounded educational assessments. Offers a methodologically rigorous review of cognitive and learning sciences models for testing purposes as well as the latest statistical and technological know how for designing scoring and interpreting results. Written by an international team of contributors at the cutting edge of cognitive psychology and educational measurement under the editorship of a research director at the Educational Testing Service and an esteemed professor of educational psychology at the University of Alberta as well as supported by an expert advisory board. Covers conceptual frameworks, modern methodologies and applied topics in a style and at a level of technical detail that will appeal to a wide range of readers from both applied and scientific backgrounds. Considers emerging topics in cognitively grounded assessment including applications of emerging socio-cognitive models, cognitive models for human and automated scoring and various innovative virtual performance assessments. **Biology: How Life Works (Volume 1)** James Morris, 2013-01-04 Ordinarily textbooks are developed by first writing chapters, then making decisions about art and images and finally once the book is complete assembling a test bank and ancillary media. This process dramatically limits the integration across resources and reduces art, media and assessments to ancillary material rather than essential resources for student learning. *Biology How Life Works* is the first project to develop three pillars: the text, the visual program and the assessment at the same time. All three pillars were

developed in parallel to make sure that each idea is addressed in the most appropriate medium and to ensure authentic integration. These three pillars are all tied to the same set of core concepts, share a common language, and use the same visual palette. In this way, the text, visual program, and assessments are integral parts of student learning rather than just accessories to the text.
