The sheer number of choices and requirements can be a daunting challenge to face for beginners and veterans alike. With this book, you will learn how to build a robust, customizable virtual environment suitable for both a personal home lab as well as a dedicated office training environment. You will learn how to understand the mechanics of virtualization and how they influence the design of your lab. Build an extensive baseline lab environment on any one of five commonly used hypervisors: VMware vSphere Hypervisor, VMware Fusion, VMware Workstation, Oracle VirtualBox, and Microsoft Hyper-V. Harden your lab environment against VM escapes and other security threats. Configure the pfSense firewall distribution to provide security segmentation and network services to your virtual lab. Deploy either Snort or Suricata open source IDS platforms in IPS mode to further enhance the flexibility, segmentation, and security of your lab network. Deploy Splunk as a log management solution for your lab. Reconfigure the provided baseline lab environment to better suit your individual needs.
