On Board Apollo Moonships:

Chariots for Apollo Courtney G. Brooks, James M. Grimwood, Loyd S. Swenson, Paul Dickson, 2009-03-26 Written by a trio of experts this is the definitive reference on the Apollo spacecraft and lunar modules It traces the design of the vehicles their development and their operation in space More than 100 photographs and illustrations highlight the text which begins with NASA s origins and concludes with the triumphant Apollo 11 moon mission *Apollo 11* Robert Godwin, 1999 CD ROM and Book Foreword written by Buzz Aldrin Since the first glimmerings of intellect on planet Earth the moon s quicksilver light has beckoned On July of 1969 the people of the world were witness to an event which was the undisputed scientific accomplishment of the 20th century When astronauts Neil Armstrong and Edwin Buzz Aldrin planted their footsteps in the barren dusty powder of the lunar surface they not only fulfilled President John Kennedy s bold challenge but also mankind s ancient dream An accomplishment without parallel the flight of Apollo 11 stands alone as humanity s greatest feat of imagination made manifest Some of the rare official documentation of this inspirational voyage is collected and made commercially available for the first time **Where No Man Has Gone Before** William David Compton, 1989 When the crew of Apollo 11 splashed down in the Pacific Ocean on July 24 1969 Americans hailed the successful completion of the most complex technological undertaking of the 20th century landing humans on the moon and returning them safely to earth This document records the engineering and scientific accomplishments of the people who made lunar exploration possible It shows how scientists and engineers worked out their differences and conducted a program that was a major contribution to science as well as a stunning engineering accomplishment **Apollo** Al Cimino, 2019-05-14 Apollo follows man s dream of walking among the stars and charts how space travel and space programs have grown since then In 2019 it will have been 50 years since Neil Armstrong became the first man to walk on the Moon When his famous words came crackling across the atmosphere That s one small step for man one giant leap for mankind The first moon landing took place on July 20 1969 during the Apollo 11 mission Nine days earlier on July 11 1969 David Bowie released his iconic Space Oddity song about Major Tom the astronaut The two events resonated with people back on Earth like a match made in the heavens The crew of Apollo 11 Neil Armstrong Buzz Aldrin and Michael Collins had been launched into space by the powerful Saturn 5 a three stage rocket which was about as tall as a 36 story building It was the culmination of NASA s human spaceflight program which began 1961 This is the story of the Apollo Missions with all of its ups and downs in 1967 a cabin fire killed the entire crew of Apollo 1 and after an oxygen tank exploded the Apollo 13 crew limped back to Earth using the lunar module as lifeboat But despite Apollo s many setbacks twelve men walked on the Moon and their place in American history was assured forever Walking on the Moon Carl R. Green, 2012-07-01 Explores the Apollo 11 mission including the beginning of the Apollo program the astronauts who made the journey to the moon the technology that made it possible and the historic moon landing Provided by publisher Where No Man Has Gone Before William David Compton, 2012-08-03 This official NASA

history chronicles the behind the scenes conflicts and cooperation during the Apollo expeditions It shows how the space agency s scientists who were primarily interested in the moon itself worked out their differences with the engineers who were charged with the astronauts safe landing and return The close collaboration between the scientists and engineers ensured the success of a program that remains a major achievement for both fields The first half of the book concerns the preparations for the Moon landings tracing the development of the Apollo science program from the earliest days The second half documents the flights that followed Apollo 11 during which twelve astronauts explored the lunar surface and returned with samples for investigation The author drew upon the Lyndon B Johnson Space Center s collection of more than 31 000 Apollo related documents and conducted more than 300 interviews with program participants to assemble this definitive survey

Taking Science to the Moon Donald A. Beattie,2003-07-03 A former NASA scientist shares a behind the scenes history of the Apollo space program and the fight to include science activities in the missions In 1961 President Kennedy set a goal of putting a man on the moon in order to assert American dominance in the escalating Cold War The mission s sole purpose was to beat the Soviets to the punch So how did science get aboard the Apollo rockets And what did scientists do with the space allotted to them Donald A Beattie served at NASA from 1963 to 1973 in several management positions including as program manager of Apollo Lunar Surface Experiments In **Taking Science to the Moon** Beattie takes readers inside NASA headquarters and the struggle to include science payloads and lunar exploration as part of the Apollo program

Heppenheimer,2014-09-30 Basing his work on virtually untapped NASA archives T A Heppenheimer has produced the second volume of his definitive history of the space shuttle Volume Two traces the development of the shuttle through a decade of engineering setbacks and breakthroughs program management challenges and political strategizing culminating in the first launch in April 1981 The focus is on the engineering challenges propulsion thermal protection electronics onboard systems and the author covers in depth the alternative vehicles developed by the U S Air Force and European countries The first launch entailed a monumental amount of planning and preparation that Heppenheimer explains in detail **The ^AApollo**

Chronicles Brandon R. Brown,2019-05-08 A uniquely earthbound story of space travel The Apollo Chronicles immerses readers in the obsessive lives and work of NASA s engineers from the starting gun of the space race through the triumphant Moon landings Filled with new interviews scrubbed of technical jargon and infused with the turbulent backdrop of the 1960 s the narrative follows a handful of main characters through their longest days tightest deadlines and most confounding challenges In the end the surviving engineers reflect How exactly did we do it and what did we learn **Appointment on the Moon** Richard S. Lewis,1969 *We Reach the Moon* John Noble Wilford,1973 *Moon Missions* William F.

United States. National Aeronautics and Space Administration. Office of Public Affairs,1968 **The Apollo Missions** David
Baker,2018-12-12 Long has the moon captured the imagination of world from science fiction to astrology howling wolves to
lunar calendars To President John F Kennedy however the moon was a destination To put a man on the moon would be to
challenge Russia s recent achievements in space exploration and assert the US s technological prowess on the world stage As
we know the mission was a success and yet while everyone is familiar with Neil Armstrong s iconic line and his bold tread on
the moon s dusty surface few are privy to the events leading up to this moment Former NASA engineer David Baker gives a
behind the scenes account of the space race including the political impetus behind the mission the Apollo 8 s lunar orbit on
Christmas Eve as well as some of the tale s tragedies Bursting with fascinating stories striking photographs of the team and
exclusive material provided by NASA personnel this book perfectly captures the risk complexity and gravitas of this immense
journey [Astronomy Now](#) ,2005 **John Houbolt** William F. Causey,2020-03-15 In May 1961 President Kennedy
announced that the United States would attempt to land a man on the moon and return him safely to the earth before the end
of that decade Yet NASA did not have a specific plan for how to accomplish that goal Over the next fourteen months NASA
vigorously debated several options At first the consensus was to send one big rocket with several astronauts to the moon land
and explore and then take off and return the astronauts to earth in the same vehicle Another idea involved launching several
smaller Saturn V rockets into the earth orbit where a lander would be assembled and fueled before sending the crew to the
moon But it was a small group of engineers led by John C Houbolt who came up with the plan that propelled human beings to
the moon and back not only safely but faster cheaper and more reliably Houbolt and his colleagues called it lunar orbit
rendezvous or LOR At first the LOR idea was ignored then it was criticized and then finally dismissed by many senior NASA
officials Nevertheless the group under Houbolt s leadership continued to press the LOR idea arguing that it was the only way
to get men to the moon and back by President Kennedy s deadline Houbolt persisted risking his career in the face of
overwhelming opposition This is the story of how John Houbolt convinced NASA to adopt the plan that made history

Apollo Zack Scott,2019-05-07 Illustrations infographics and little known facts about NASA s Apollo program and the
