1.2d. The recording may not be a hundred per cent accurate as there is a small gap between the two percentages so there might be a human error that has taken place.

1.6a. The main research of this study is to see their socio-economic class and the behaviour of the 129 students. The research is there to determine which socio-economic class they are in (low or high social class) and how unethical they may act by given them an option to take the chocolate or not. The research is also trying to see if there is a correlation between the two, so if the high social class will take more or less chocolate then the low social class.

1.6b. The people who are being tested are from the University of California undergraduates and there is 129 of them involved.

1.6c. There are variables that were being used are how much they might have and earn from their job and which class they are. Another is the education they got to get in the position they are in. All the variables listed are categorical and ordinal, but there is
