CYBER-FORENSICS: TECHNIQUES FOR DIGITAL EVIDENCE AND CRIME INVESTIGATION

SURABHI RUDRAPPA, DR. SONAL RAWAL THAKER, DR. HIRAL SHUKLA, PROF. (DR.) MOHAMMED SALIM B KHAN, 2026-01-20 Digital forensics is a field of forensic science that emerged in the late 1990s and early 2000s. Its primary goal is to identify, collect, analyse, and preserve digital evidence. Crimes such as hacking, identity theft, and data breaches increased as individuals and organisations used digital devices more often. This necessitated the development of specialised methods for investigating cybercrime, gathering digital evidence, preventing similar operations in the future, and protecting digital assets. Initially, digital forensics concentrated on personal computers and other early forms of digital storage, as these were the major sources of digital forensic evidence. These investigations often required the examination of hard discs, data system logs, and other standard computer media.

Cyber Security Innovation for the Digital Economy Sergei Petrenko, 2022-09-01 Cyber Security Innovation for the Digital Economy considers possible solutions to the relatively new scientific technical problem of developing innovative solutions in the field of cyber security for the Digital Economy. The solutions proposed are based on the results of exploratory studies conducted by the author in the areas of Big Data acquisition, cognitive information technologies, cognitive technologies, new methods of analytical verification of digital ecosystems on the basis of similarity invariants and dimensions, and computational cognitivism involving a number of existing models and methods. In practice, this successfully allowed the creation of new entities, the required safe and trusted digital ecosystems on the basis of the development of digital and cyber security technologies, and the resulting changes in their behavioral preferences. Here, the ecosystem is understood as a certain system of organizations created around a certain Technological Platform that use its services to make the best offers to customers and access to them to meet the ultimate needs of clients, legal entities, and individuals. The basis of such ecosystems is a certain technological platform created on advanced innovative developments, including the open interfaces and code machine.
