Advanced Methods for the Solution of Differential Equations Marvin E. Goldstein, Willis H. Braun, 1973 This book is based on a course presented at the Lewis Research Center for engineers and scientists who were interested in increasing their knowledge of differential equations Those results which can actually be used to solve equations are therefore emphasized and detailed proofs of theorems are for the most part omitted However the conclusions of the theorems are stated in a precise manner and enough references are given so that the interested reader can find the steps of the proofs
