

Computing Discounts Activity

Context

When purchasing items, it is often not possible to take advantage of more than one retailer's offer on the same item. In this activity, you will compare the discounts offered by two different retailers. You will use retail prices, the difference between the reference price and the actual price to calculate the savings. Alternatively, you can calculate an effective percentage discount on the sale, which represents the percentage by which the price is lowered by the retailer. The savings percentage is the amount by which the price is lowered by the retailer.

Savings Percentage = $\frac{\text{Retail Price} - \text{Reference Price}}{\text{Reference Price}}$

Effective Percentage = $\frac{\text{Reference Price} - \text{Retail Price}}{\text{Reference Price}}$

Effective Percentage = $\frac{\text{Reference Price} - \text{Retail Price}}{\text{Reference Price}}$ = $\frac{\text{Retail Price} - \text{Reference Price}}{\text{Reference Price}}$

Effective Percentage = $\frac{\text{Reference Price} - \text{Retail Price}}{\text{Reference Price}}$

Effective Percentage = $\frac{\text{Reference Price} - \text{Retail Price}}{\text{Reference Price}}$

Figure 1: Comparison of Retail Prices

Item	Reference Price	Retail	Effective %
Apple	\$100.00	\$80.00	20%
Banana	\$0.50	\$0.40	20%
Bread	\$2.00	\$1.60	20%
Chocolate	\$10.00	\$8.00	20%
Coffee	\$5.00	\$4.00	20%
Donuts	\$1.00	\$0.80	20%

Figure 2: Comparison of Retail Prices and Effective Discounts

In this activity, you will compare the savings on the same item from two different retailers. You will use retail prices, the difference between the reference price and the actual price, and the savings percentage to compare the two retailers.

1. The reference price is the price of the item before the discount. The retail price is the price of the item after the discount. The savings percentage is the percentage by which the price is lowered by the retailer.
2. The effective percentage is the percentage by which the price is lowered by the retailer. The savings percentage is the percentage by which the price is lowered by the retailer.
3. The effective percentage is the percentage by which the price is lowered by the retailer. The savings percentage is the percentage by which the price is lowered by the retailer.
4. The effective percentage is the percentage by which the price is lowered by the retailer. The savings percentage is the percentage by which the price is lowered by the retailer.
5. The effective percentage is the percentage by which the price is lowered by the retailer. The savings percentage is the percentage by which the price is lowered by the retailer.

Computing Discounts Answers

Edward Lee Thorndike

Computing Discounts Answers:

Embracing the Track of Phrase: An Mental Symphony within **Computing Discounts Answers**

In a global eaten by monitors and the ceaseless chatter of fast communication, the melodic beauty and mental symphony developed by the written term usually disappear into the back ground, eclipsed by the persistent noise and disruptions that permeate our lives. Nevertheless, nestled within the pages of **Computing Discounts Answers** a wonderful literary treasure full of natural feelings, lies an immersive symphony waiting to be embraced. Constructed by a wonderful musician of language, that fascinating masterpiece conducts visitors on an emotional journey, well unraveling the hidden melodies and profound influence resonating within each carefully constructed phrase. Within the depths with this moving assessment, we will investigate the book is key harmonies, analyze their enthralling writing design, and surrender ourselves to the profound resonance that echoes in the depths of readers souls.
