Presuppositions and Discourse: Essays Offered to Hans Kamp Rainer Bauerle, Uwe Reyle, Thomas Zimmermann, 2010-03-23 So it is hardly a decade ago that presupposition theory has been cast into a promising theoretical form And as this provided an inspiring starting point for further research we thought that at the turn of the century the time had come to discuss what the new theory had taught us and which promising further perspectives had been opened up This was the motivation behind the conference on Presupposition which we convened in Stuttgart in October 2000 and which gave rise to the papers collected in this volume The conference was funded by the Deutsche Forschungsgemeinschaft which we gratefully acknowledge Undoubtedly presupposition theory is a major chapter in the success story of dynamic semantics A

conference on the topic thus also seemed to us the ideal birthday present for one of the founding fathers of dynamic semantics our teacher and friend Hans Kamp on his 60th birthday To him we dedicate the volume as an expression of our gratitude for his untiring effort to make us understand

Future Communication Technology and Engineering Kennis Chan, 2015-04-06 This volume contains the papers presented at the 2014 International Conference on Future Communication Technology and Engineering FCTE2014 taking place in Shenzhen China from 16-17 November 2014. Communication technologies are developing quickly and there are more possibilities for future communication technologies provided by the achievements made rather than limitations. At the convention innovative and inspiring ideas were presented. Certain controversial topics were discussed e.g. what are the most efficient convenient methods for information communication and what is the most probable prospect for future communication technology. It is difficult to make any definite conclusions from these presentations and discussions but the desire and drive for improvement and development shown by the participants authors are surely remarkable and respectable. In this book 70 papers are included chosen from hundreds of submissions contributed by scientists from various countries and regions after careful reading and discussing by a team of reviewers. These papers cover almost every possible aspect of communication technology including communication systems automation and control engineering electrical engineering AI algorithms signal processing data mining and knowledge based systems.

Cloud Computing Igor Faynberg, Hui-Lan Lu, Dor Skuler, 2015-11-02. *Cloud Computing Business Trends and Technologies* provides a broad introduction to Cloud computing technologies and their applications to IT and telecommunications businesses i.e. the network function virtualization NFV. To this end the book is expected to serve as a textbook in a graduate course on Cloud computing. The book examines the business cases and then concentrates on the technologies necessary for supporting them. In the process the book addresses the principles of as well as the known problems with the underlying technologies such as virtualization data communications network and operations management security and identity management. It introduces through open source case studies based on OpenStack an extensive illustration of lifecycle management. The book also looks at the existing and emerging standards demonstrating their respective relation to each topic. Overall this is an authoritative textbook on this emerging and still developing discipline which guides the reader through basic concepts to current practices to state of the art applications. Considers technical standards bodies involved in Cloud computing standardization. Is written by innovation experts in operating systems and data communications each with over 20 years experience in business research and teaching.
