Learning Angular Marc Wandschneider, 2017 Learning Angular Covering Angular 2 4 and 5 2nd Edition A clear practical introduction to web application development with Angular 2 and Angular 4 with preliminary coverage of Angular 5

Description Angular is a powerful JavaScript framework maintained by Google for building web applications and for enhancing various parts of your web pages It s a comprehensive framework that makes both development and testing easier by extending web applications with MVC capability

Marc Wandschneider senior developer advocate at Google has more than 20 years of experience as a developer and is the author of two programming books and two other LiveLessons video training

In this video training Marc uses a live coding approach throughout to show developers how to start from scratch and work their way up to building a meaningful yet not overly complicated application

In this video training Marc starts by introducing Angular and showing how to install it along with related tools like Node js TypeScript Bootstrap Angular CLI and Visual Studio Code

After a quick tutorial on TypeScript the video course next shows how to create an Angular application from scratch while explaining the primary pieces of an Angular application and see how they work together

Using lots of examples the core parts of Angular are introduced such as Components Directives the Router Services and Pipes and Directives

About the Instructor Marc Wandschneider has worked extensively with open source and web development platforms He travels the globe consulting as a lead manager for software projects and teams He is the author of the book Learning Node js Addison Wesley and the video courses Learning Node js and Learning Angular LiveLessons

A graduate of the McGill University School of Computer Science he spent five years working for Microsoft where he developed and managed developers on the Visual Basic Visual J and NET Windows Forms teams
