The Sea Grant International Program Todd D. Ebitz, Thomas E. Murray, 1984 A Community Enterprise Malcolm Tull, 2017-10-18 This volume concerns the history of the Australian port of Fremantle located on the edge of Western Australia and the Indian Ocean throughout the hundred years of frequent changes to its structure and function between 1897 and 1997 Tull's aim is to use Fremantle as a prime example of the complex network of a Port as a community and a place of vast and varied maritime business endeavours He seeks to erase the perception of ports as passive links in the international transport chain in order to draw ports to the attention and further research of maritime historians The chapters are arranged thematically rather than chronologically and includes statistical appendices a bibliography and an index for ease of navigation Transactions and Notes of the Concrete Institute, 1963 Proceedings of the International Conference on Geosynthetics and Environmental Engineering Han-Yong Jeon, 2023-10-02 This book presents selected papers from the Proceedings of the International Conference on Geosynthetics and Environmental Engineering ICGEE 2023 held in Jeju Island South Korea covering topic areas in geosynthetic applications and sustainability civil and structural engineering and environmental engineering and science The published articles cover the latest research studies with the focus of discussing the relationship between geotechnical materials and environmental engineering in depth to solve complex geosynthetic issues in civil and environmental engineering It also highlights state of the art technologies adopted by the relevant industries which are not only commercially viable but also environmentally sustainable The content of the papers appeals to researchers and industrial practitioners working in the field of geoenvironmental engineering Hydraulic performance of an impermeable submerged structure for tsunami damping Agnieszka Strusinska, 2011-02-01 In the face of the enormous destruction caused by the December 26 2004 Indian Ocean tsunami event it is necessary to utilize more effective means of tsunami mitigation to prevent such tragedies Based on the experiences gathered in storm wave damping by using submerged structures Agnieszka Strusinska examines the applicability of artificial reefs as an integrated part of a multi defence line strategy for tsunami attenuation In her study she first discusses the results of laboratory experiments in order to identify the difference in the nonlinear interaction of storm and tsunami like solitary waves with an impermeable submerged structure of a finite width including generation of wave breaking and wave fission With this basic knowledge the damping performance of an artificial reef under tsunami impact is determined as a ratio of wave transmission wave reflection and wave energy dissipation for varying reef geometries and incident wave conditions using a Boussinesq type numerical model **Port Designer's Handbook** Carl A. Thoresen, 2003 Over the past twenty years there has been considerable improvement and new information in the design of port and berth structures This handbook reflects the latest progress and developments in navigation safety port planning and site selection layout of container oil and gas terminals cargo handling berth design and construction fender and mooring principles It presents guidelines and recommendations for the main items and assumptions in the layout

designing and construction of modern port structures and the forces and loadings acting on them The book provides an evaluation of different designs and construction methods for port and berth structures and recommendations given by the different international harbour standards and recommendations Practising harbour and port engineers and students will find the handbook an invaluable source of information
