Artificial intelligence AI opens new opportunities for STEM education in K 12 higher education and professional education contexts This book summarizes AI in education AIED with a particular focus on the research practice and technological paradigmatic shifts of AIED in recent years The 23 chapters in this edited collection track the paradigmatic shifts of AIED in STEM education discussing how and why the paradigms have shifted explaining how and in what ways AI techniques have ensured the shifts and envisioning what directions next generation AIED is heading in the new era As a whole the book illuminates the main paradigms of AI in STEM education summarizes the AI enhanced techniques and applications used to enable the paradigms and discusses AI enhanced teaching learning and design in STEM education It provides an adapted educational policy so that practitioners can better facilitate the application of AI in STEM education This book is a must read for researchers educators students designers and engineers who are interested in the opportunities and challenges of AI in STEM education

Digital Health Technologies for Shared Decision Making Marcus Cheetham, Christoph A. Meier, Nikola Biller-Andorno, Helena Canhao, Anna Lisa Martin-Niedecken, Annina Gähwiler, 2025-05-22
Patient decision aids provide a promising means to empower patients to prepare and participate in Shared Decision Making SDM with health care professionals A wide range of clinically validated and non validated digital and non digital patient decision aids continue to be developed for use in diverse settings and clinical interventions The end users of a given aid may be heterogeneous in their needs abilities backgrounds and personal characteristics Many patient decision aids are developed with the aim of helping patients clarify and communicate their subjective values and preferences in relation to the medical choices at hand Knowledge of these values and preferences can help patients and health care professionals determine the medical intervention that is right for the patient Digital health technologies present unique opportunities for creating new ways to advance the design adoption usage and evaluation of patient centred decision aids and support the clarification and communication of subjective values and preferences However there is a dearth of systematic research on these opportunities This Research Topic focuses on the current use of and the opportunities that digital technologies present for furthering the design development deployment and usefulness of patient decision aids Potential themes include but are not limited to 1 Digital technology and patient decision aids 2 New approaches designs developments and innovations 3 Human factors in elucidating subjective values and preferences 4 Awareness and real world use of digital patient decision aids 5 Usability and acceptability of digital patient decision aids 6 Current and potential applications in different settings 7 Barriers and facilitators to use of digital technology in SDM 8 Future possibilities and challenges of patient decision aids and digital technology 9 Inclusion diversity and accessibility of patient decision aids with digital technology and 10 Ethical technical and regulatory design considerations This Research Topic welcomes original research review method and theory and perspective

articles that address the diversity of themes around digital health technologies and human factors in patient decision aids
Brief research reports and mini reviews are also encouraged Articles types should be selected that correspond with the stage of research and scope of the contribution
