

10. If you are given different frequency table, which column will be the class frequency table?

Answer:

Column 2 shows class frequency table because it is written in the table.

Example: The following table represents the distribution of marks obtained by 100 students in the 10th class. The class 70-80 has the highest number of students. Which column is the class frequency table?

Answer:

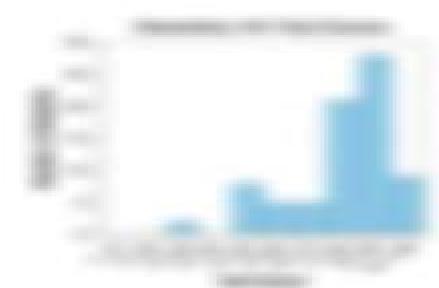

In the graph, the class of maximum height is which the height of the bar represents the number of students in each category.

Example: The following bar graph shows the number of students in each class in a school. The number of students in which class is the highest?

Answer:

In a histogram, the height of each bar represents the frequency of the corresponding class. Therefore, the class having highest number of students will have the highest bar in the histogram.
