Facility Layout And Location An Analytical Approach In:

Facility Layout and Location R. L. Francis, Leon Franklin McGinnis, John A. White, 1992 Providing a comprehensive introduction to quantitative methods for facility layout and location this text is directed at senior and graduate level students in industrial engineering manufacturing systems management science and operations research curricula Problems of facility layout and location are treated together because of the similarity between arranging the space in a single facility and arranging a systems of facilities An introduction to the field issues and literature is included along with the basic tools and methodologies The second edition revises over half of the text to provide material reflecting the most current developments Chapters contain explanations of what layout and location problems are how to collect data and show how to model and solve such problems

Facility Location Reza Zanjirani Farahani, Masoud Hekmatfar, 2009-07-09

Location problems establish a set of facilities resources to minimize the cost of satisfying a set of demands customers with respect to a set of constraints This book deals with location problems It considers the relationship between location problems and other areas such as supply chains

Applications of Location Analysis H. A. Eiselt, Vladimir Marianov, 2015-09-22 This book companion to Foundations of Location Analysis Springer 2011 highlights some of the applications of location analysis within the spheres of businesses those that deal with public services and applications that deal with law enforcement and first responders While the Foundations book reviewed the theory and first contributions this book describes how different location techniques have been used to solve real problems Since many real problems comprise multiple objectives in this book there is more presence of tools from multicriteria decision making and multiple objective optimization The section on business applications looks at such problems as locating bank branches the potential location of a logistics park sustainable forest management and layout problems in a hospital a much more difficult type of problem than mere location problems The section on public services presents chapters on the design of habitats for wildlife control of forest fires the location of intelligent sensors along highways for timely emergency response locating breast cancer screening centers an economic analysis for the locations of post offices and school location The final section of the book includes chapters on the well known problem of locating fire stations a model for the location of sensors for travel time information the problem of police districting locations of jails location of Coast Guard vessels and finally a survey of military applications of location analysis throughout different periods of recent history

Material Flow-based Analysis of Manufactured Housing Production

Plant Facility Layout Deblina Banerjee, 2003

Facility Location Zvi Drezner, Horst W. Hamacher, 2004-05-03 The book covers both theory and applications of locational analysis LocAn The reader will see the power of LocAn models in various real world contexts varying from communication design to robotics and mail delivery It is divided into two parts The first part contains an overview of some of the LocAn methodologies The second part describes in thorough detail some selected

applications The text provides researchers with an excellent and well thought out review of available location models

Locational Analysis of Public Facilities Jacques-François Thisse, Henry Zoller, 1983 The concern of economists and location theorists for the problem of public facility location is growing rapidly The present collection of essays aims to provide an overview of the problem both from the perspective of economic theory and operations research A study of some basic ingredients of a public space theory and one on the main tools for spatial decision making are offered This is reflected in the content of the book which is divided into two parts The first part deals with the theory of local public goods and with public decision making procedures in the spatial context A survey of the current literature on local public goods is proposed and contributed papers follow which are devoted to particular aspects or to a critical discussion of the main approaches Voting procedures in a spatial context are reviewed and extended Then follows an application of planning theory to public goods in space The second part is relative to the operational analysis of locational decisions in the public sector The major models and methods are reviewed their computational efficiency is reported on and some of their fundamental properties are discussed Location allocation models are analyzed and criticized from the welfare economics standpoint and some suggestions are made for future research The book addresses a large audience including economists regional scientists operations researchers and geographers interested in the theory of public space and spatial planning
