**Some Observations on the Tracks of Depressions Over the Eastern Half of the North Atlantic** Trevor M. Thomas,1960 *Automated Student Attendance System Using "RFID"*. Barzan Awat Ali,2016 Since the invention of computers developers are working progressively to create automated machines in the area of artificial intelligence In conjunction with the evolution of artificial intelligence techniques the artificial area has developed robustly and at the present time scientists are creating machines that are able to check student s attendance that is the machine that has an artificial sense Intelligent machines that can help humans perform daily activities easier are widely developed today and they attract user s attention to a high degree One of the important daily activities to many users especially education departments and institutions is checking student s attendance The idea of this project is to develop an automated attendance system to help schools and universities with their attendance checking systems Creating a project like this will aid education departments world widely especially in developing countries for instance here in Kurdistan Region checking student

attendance is an important issue for universities concerning the policies regarding attending classes and in almost every university in Kurdistan pen and paper is been used to control student s attendances This old techniques of controlling student attendance takes too much time and problems occurs while taking it Having systems like RFID Radio Frequency Identification will give us ideas to create a system for taking attendance of students which makes the process easier
