Primary Care Revisited Ben Yuk Fai Fong, Vincent Tin Sing Law, Albert Lee, 2020-06-03 This book adopts an interdisciplinary approach with a wide scope of perspectives on primary healthcare, describing related principles, care models, practices, and social contexts. It combines aspects of development research and education applied in primary health care, providing practitioners and scholars with a comprehensive overview of the current knowledge and delivery models of healthcare in community settings. It covers the practical, philosophical, and scholarly issues pertinent to the delivery, financing, planning, ethics, health politics, professional and technological development, resources, and monitoring in primary health care. Contributors are from a diverse range of academic and professional backgrounds, bringing together collective expertise in mainstream medicine, nursing, allied health, Chinese medicine, health economics, administration, law, public policy, housing, management, information technology, and mass communications. As such, the book does not follow the common clinical practice or service-based approach found in most texts on primary care. The contents will serve as a useful reference work for policymakers, researchers, community health practitioners, health executives, and higher education students.

Casebook in Abnormal Psychology Timothy A. Brown, David H. Barlow, 2001 Using cases taken from the authors' case files or from case files of other working clinicians, this casebook portrays the rich and arresting nature of disorders as they are displayed in real people. Cases illustrate every major DSM-IV category and are followed by a therapy outcome section which gives the rest of the story of what happened to these clients. The authors draw on an extremely current and thorough database, look at the multiple causes of disorders, and incorporate developmental and cultural issues in each case. Two complex cases are included without a diagnosis to give students an opportunity to come up with diagnoses on their own.

Self-directed Behavior David L. Watson, Roland G. The most important goal of this volume is to help you achieve more self-determination, more willpower, and more control over your own life. From preface.

Because many students given a set of data cannot determine where to begin in answering relevant research questions, the authors explicate the issues involved in selecting a statistical test. Each statistical technique is introduced by giving instances where the test is most typically applied, followed by an interesting research example; each example is taken
