Memorial Tributes National Academy of Engineering,2001-05-02 This is the 9th Volume in the series Memorial Tributes compiled by the National Academy of Engineering as a personal remembrance of the lives and outstanding achievements of its members and foreign associates These volumes are intended to stand as an enduring record of the many contributions of engineers and engineering to the benefit of humankind In most cases the authors of the tributes are contemporaries or colleagues who had personal knowledge of the interests and the engineering accomplishments of the deceased Through its members and foreign associates the Academy carries out the responsibilities for which it was established in 1964 Under the charter of the National Academy of Sciences the National Academy of Engineering was formed as a parallel organization of outstanding engineers Members are elected on the basis of significant contributions to engineering theory and practice and to the literature of engineering or on the basis of demonstrated unusual accomplishments in the pioneering of new and developing fields of technology The National Academies share a responsibility to advise the federal government on matters of science and technology The expertise and credibility that the National Academy of Engineering brings to that task stem directly from the abilities interests and achievements of our members and foreign associates our colleagues and friends whose special gifts we remember in this book

Civil, Structural and Environmental Engineering Xiang Dong Zhang,Bin Zhang,Li Zhong Jiang,Mo Wen Xie,2013-11-08 Selected peer reviewed papers from the 2013 2nd Global Conference on Civil Structural and Environmental Engineering GCCSEE 2013 September 28 29 2013 Shenzhen China

Professional Memoirs, Corps of Engineers, United States Army and Engineer Department at Large ,2003 Revamping Architectural Education Rajesh Sharma,2018-06-08 The book that you hold in your hands is a treasure trove of ideas to set into motion a new generation of learning for architects As the author is a practitioner of this technology called architecture he have often felt that globally it is the last field of knowledge that still displays vestiges of a holistic renaissance attitude of mind It has not fallen victim to our global love for economic development above all other considerations and is not always a handmaiden of consumerist culture Architects are somewhat obsessed with form Despite this or inspite of it the combine and harmonize the field of applied arts with the sciences the attitudes of engineering optimization with the expression of the visual arts covering subjects as diverse as chemistry and history India is possibly the world s largest future market for private sector architects today If we do not adapt our archiectural practice starting with our architectural teaching practices we run the clear and present danger of becoming

extinct in the race for economic development and urbanization which is truly sustainable resilient sufficient and equitable In reading this little gem of a book the author would urge the reader to look beyond formulae and descriptions and generate an agenda for reform beyond just the curriculum and towards transformation As Indian society struggles to understand its architects the profession owes a duty to itself to remain relevant to social needs and aspirations to create a nation of our dreams And the author hopes that the beginning of that agenda can be found in the pages of this book interpreted by every reader individually
