Cheminformatics, QSAR and Machine Learning Applications for Novel Drug Development Kunal Roy, 2023-05-23

Cheminformatics QSAR and Machine Learning Applications for Novel Drug Development aims at showcasing different structure based ligand based and machine learning tools currently used in drug design It also highlights special topics of computational drug design together with the available tools and databases The integrated presentation of chemometrics cheminformatics and machine learning methods under is one of the strengths of the book The first part of the content is devoted to establishing the foundations of the area Here recent trends in computational modeling of drugs are presented Other topics present in this part include QSAR in medicinal chemistry structure based methods cheminformatics and chemometric approaches and machine learning methods in drug design The second part focuses on methods and case studies including molecular descriptors molecular similarity structure based based screening homology modeling in protein structure predictions molecular docking stability of drug receptor interactions deep learning and support vector machine in drug design The third part of the book is dedicated to special topics including dedicated chapters on topics ranging from de design of green pharmaceuticals to computational toxicology The final part is dedicated to present the available tools and databases including QSAR databases free tools and databases in ligand and structure based drug design and machine learning resources for drug design The final chapters discuss different web servers used for identification of various drug candidates Presents chemometrics cheminformatics and machine learning methods under a single reference Showcases the different structure based ligand based and machine learning tools currently used in drug design Highlights special topics of computational drug design and available tools and databases

**Agri 4.0 and the Future of Cyber-Physical Agricultural Systems** Seifedine Kadry, Vandana Sharma, Rajesh Kumar Dhanaraj, Rutvij H. Jhaveri, Gandhiya Vendhan, 2024-04-16 Agri 4 0 and the Future of Cyber Physical Agricultural Systems is the first book to explore the potential use of technology in agriculture with the focus on the technologies enabling the reader to better comprehend the full range of CPS opportunities From planning to distribution CPS technologies are available to impact agricultural output delivery and consumption The impact for food security may be significant and this book explores ways to implement CPS effectively and appropriately Technology especially computing technology can play a significant in the field of agriculture by processing digitized data to solve the complex agronomic agricultural demand and supply issues that impact the food supply chain and ultimately food security In Agri 4 0 the cyber physical system synchronously interacts with agricultural systems to control and execute the operation autonomously Digitalization of agriculture integrates digital computers to assist the processes of agriculture with its digitized data and its allied technology including AI Computer Vision Big data Block chain and IoT Agri 4 0 digitalizes estimate plan predict and produce the optimum agricultural inputs and outputs for the required for commercial purposes It can be used to get a fair transparent and accountable process to serve the stakeholders The convergence of IoT ML Big data

and 5G networks have opened new possibilities to explore and exploit the cyber physical agricultural systems The management and practices of smart multi layer architecture and smart supply chain are one of the key application areas in Agri 4 0 The global team of authors also presents important insights into promising areas of precision agriculture autonomous systems smart farming environment smart production monitoring pest detection and recovery sustainable industrial practices and government policies in Agri 4 0 Addresses one of the most complex applications of CPS Describes various technologies covering CPS in agriculture from precision agriculture to smart supply chain management Focuses on the digital framework tools and systems capable of supporting Agri 4 0

Redox and Metabolic Circuits in Cancer Salvatore Rizza,Andrea Rasola,Danyelle M. Townsend,Giuseppe Filomeni,2018-12-21 Living cells require a constant supply of energy for the orchestration of a variety of biological processes in fluctuating environmental conditions In heterotrophic organisms energy mainly derives from the oxidation of carbohydrates and lipids whose chemical bonds breakdown allows electrons to generate ATP and to provide reducing equivalents needed to restore the antioxidant systems and prevent from damage induced by reactive oxygen and nitric oxide NO derived species ROS and RNS Studies of the last two decades have highlighted that cancer cells reprogram the metabolic circuitries in order to sustain their high growth rate invade other tissues and escape death Therefore this broad metabolic reorganization is mandatory for neoplastic growth allowing the generation of adequate amounts of ATP and metabolites as well as the optimization of redox homeostasis in the changeable environmental conditions of the tumor mass Among these ROS as well as NO and RNS which are produced at high extent in the tumor microenvironment or intracellularly have been demonstrated acting as positive modulators of cell growth and frequently associated with malignant phenotype Metabolic changes are also emerging as primary drivers of neoplastic onset and growth and alterations of mitochondrial metabolism and homeostasis are emerging as pivotal in driving tumorigenesis Targeting the metabolic rewiring as well as affecting the balance between production and scavenging of ROS and NO derived species which underpin cancer growth opens the possibility of finding selective and effective anti neoplastic approaches and new compounds affecting metabolic and or redox adaptation of cancer cells are emerging as promising chemotherapeutic tools In this Research Topic we have elaborated on all these aspects and provided our contribution to this increasingly growing field of research with new results opinions and general overviews about the extraordinary plasticity of cancer cells to change metabolism and redox homeostasis in order to overcome the adverse conditions and sustain their individualistic behavior under a teleonomic viewpoint
