Decision-making and economics of adaptation to climate change in the fisheries and aquaculture sector Watkiss, P.; Ventura, A.; Poulain, F.,2019-12-19 This publication reviews available information on the costs and benefits of climate change adaptation in the fisheries and aquaculture sector highlights the challenges in applying conventional appraisal and decision support tools to adaptation and

reviews emerging frameworks including low regret actions addressing potential lock in and early planning for long term adaptation as well as economic tools to appraise adaptation options in fisheries and aquaculture Risk Management Glen B. Alleman, Jon M. Quigley, 2024-03-15 Project success is an elusive goal in every business or technical domain Project failure usually results from unhandled risks to the technical cost and schedule aspects of the project There are four primary root causes of project failure Unrealistic performance expectation with missing Measures of Effectiveness Unrealistic cost and schedule estimates based on inadequate risk adjusted growth models Inadequate assessment of risk and unmitigated exposure to these risks without proper handling strategies Unanticipated technical issues with alternative plans and solutions to maintain the effectiveness of the project processes and its deliverables Risk Management provides a comprehensive overview of the people principles processes and practices as the fundamental base upon which an effective risk management system resides However this does not guarantee effective risk management and successful projects and businesses The first half of the book describes risk management processes as well as a delineation between risk and hazards and how these are connected The second half of the book provides industry examples of the approach to risk management in specific context and with specific approaches and artifacts where applicable The book focuses on risks created by uncertainty their identification and the corrective and preventive actions needed to address these risks to increase the probability of project success The book s goal is to provide a context driven framework developing a foundation for a rational approach to risk management that makes adaptation to circumstances as easy as possible **Aviation Investment** Doramas Jorge-Calderón, 2020-12-28 Aviation Investment uniquely addresses investment appraisal methods across the key industries that make up the aviation sector including the airports air traffic management airline and aircraft manufacturing or aeronautic industries This practice oriented book presents methods through realistic case studies It covers both economic appraisal or cost benefit analysis measuring the value of projects to society and financial appraisal valuing projects as cash generators This substantially expanded second edition covers in greater detail the treatment of environmental emissions paying particular attention to climate change It addresses the treatment of Market Based Mechanisms MBMs including cap and trade systems like ETS and offset systems like CORSIA and compares them to environmental taxes It also addresses the adjustments needed to measure the foreign exchange generating value of projects relevant in the presence of trade barriers The new edition includes two new project types One is airport relocations perhaps the most complex type of airport projects where the economic case is often more nuanced than may be apparent The second is the re introduction of supersonic travel Aviation Investment offers all aviation sub sectors a single source reference bringing together the theoretical background of the economic appraisal literature and aviation investment in practice It is written in a style that is accessible to non academic professionals using formulae only where strictly necessary to enable practical applications and benefits from the substantial practical experience of the author Analysis of Energy Systems Vincenzo Bianco, 2017-05-12 The analysis of energy

Uncertainty in Climate Change Research Linda O. Mearns, Chris E. Forest, Hayley J. Fowler, Robert Lempert, Robert L. Wilby, 2025-07-14. This edited volume with open access discusses all aspects of uncertainty in climate change research with a unique emphasis on decision making under uncertainty and the assessment of various uncertainties in the landscape of decision making. By analyzing uncertainty through the lens of decision making the book seeks to understand and assess the various uncertainties inherent in climate change research including uncertainties in economic impacts human health and vulnerability fluctuations in the physical climate system changes in infrastructure and future climate projections. Very little published material exists on the uncertainties regarding vulnerability of different populations to climate change and so the book characterizes the uncertainty in vulnerability to better formulate solutions to climate change problems in affected populations. The volume will be of interest to students post docs early career scientists and researchers interested in all aspects of climate change. After an introduction that addresses the issue of uncertainty in general as it pertains to climate change research the book is divided into 5 main sections. Section 1 focuses on uncertainty in policy and decision making and how climate related policy choices impact risk management impact mitigation and adaptation. Section 2 discusses uncertainty in climate change impacts including impacts in agriculture water resources transportation infrastructure and human health and vulnerability. Section 3 analyzes physical climate uncertainties such as Earth system projections emissions concentrations and sea level rise projections. Section 4 details the methods for quantifying uncertainty from a statistical perspective. Section 5 concludes the volume with discussions on special topics and

integrated themes on uncertainty including ethics and uncertainty communication the economics of climate change and integrated modeling for decision support *Humanitarian Crises, Intervention and Security* Liesbet Heyse, Andrej Zwitter, Rafael Wittek, Joost Herman, 2014-10-10 Offers a new theoretical framework for evidence based programming in humanitarian action Encompasses the theories of security studies anthropology and sociology for students and practitioners of humanitarian intervention Will be of much interest to students of humanitarian intervention human security peace and conflict studies and IR in general as well as NGOs and policymakers

Transport Project Evaluation Elvira Haezendonck, 2007 This book revisits traditional evaluation methods such as cost benefit analysis to try and find a balance between the ever increasing demand for transport the search for sustainable mobility and green transport solutions and the limited financial resources that governments are able to invest in transport infrastructure projects In this respect the effects of transport policy need to be measured and evaluated based on multiple criteria and the need to take into consideration a larger group of stakeholders and investors in transport projects The book illustrates methodologically and empirically why and how the institutional and multi actor environment impacts upon the analysis evaluation and decision making of transport projects in Europe Including contributions from scholars with considerable expertise in the field this book will be of great interest to consultants policymakers and researchers
