ROTAVATOR**

REG. TRADE MARK

P Series

**now with the
revolutionary**

"Selectatilt"
gearbox

Here is a machine providing every single up to date feature of rotavation, but at a lower cost. The new P-mounted Rotavator is designed specially for the owners of tractors from 15 to 35 belt h.p. and fits on to any 3-point hydraulic lift. It incorporates 4-speed "Selectatilt" giving controlled tillage. "Selectatilt" is a Howard exclusive feature, which varies the digging rotor speed, a slow turning rotor will produce a cloddy soil finish, a higher speed produces a much finer finish. Thus, the machine will produce the result that the operator requires. Simple design and volume production bring down the cost of this model, yet every single up to date feature is included. The soil shield is fully adjustable to control soil flow, the machine is raised and lowered hydraulically. Depth control is precise. Weed cutters are fitted to each side of the rotor.

Transmission to the rotor drive is carried by heavy duty gears.

The "scroll" design of the rotor ensures that tractor power is transmitted evenly across the length of rotor ensuring a uniform result in depth and width. 50" and 60" models are available to meet all farm demands, in offset form for general field work. A 40" version is available which can be fitted either centrally mounted or offset.

"Selectatilt" fitted to the P Series gives the best rotavation at a lower cost.

Selectatilh Rotavator Manual
