HARLEY-DAVIDSON CASE STUDY

Introduction

Harley-Davidson has over the years continued to remain a dominant force in the motorbike industry globally. Its name, 'HARLEY-DAVIDSON', was derived from its founders Arthur, Walter Davidson and William Harley in 1903. Like every other commodity, Harley-Davidson's motorbike experienced the product life cycle. The introduction stage where it began operations in 1907 with one full time employee, its growth through research, investment and innovation, its maturity when it became the world's largest motorcycle company in 15 years (1903-1918) having produced 28000 motorcycles then its decline when it lost 80% of market share to the Japanese competitors. Despite the intense competition from its rivals, aging customer base, the economic downturn and the high value of its products, the company weathered the storm by remaining profitable. Harley-Davidson carved a niche market for itself being a pioneer in the industry and essentially because it sold lifestyle to its customers. It continued to explore opportunities, offer incentives that rebranded its image, make strategic decisions, innovation coupled with its focus on research and development.

1. Harley-Davidson continue to operate in the motor bike industry which is characterised by major features like fierce competition, differentiation strategies and demographics.

Firstly, Harley-Davidson was the biggest motorcycle firm in the United States until the late 1950's when the Japanese companies penetrated the local market. This created a competitive environment which affected the market share, sales and profits of Harley-Davidson. Hitt, Black and porter (2014) opined that a larger number and diversity of competitors produce more complex environments. For example, Honda's production of the most technologically advanced heavyweight motorcycle in 1975 caused Kawasaki, another Japanese company, to manufacture its own. Harley-Davidson was gradually losing its competitive advantage because

web design and testing of automobile exhaust system esat journals the aim of this paper is to provide deeper understanding of the dynamics of automobile exhaust system to provide a basis for the improved design development of computationally inexpensive theoretical system model

engineering material selection for automotive exhaust systems - May 12 2023

web owing to this revolution material selection prior to manufacturing of automotive exhaust systems has been very crucial a typical automotive exhaust system incorporates piping system that directs hot reaction gases away from the combustion chamber of an internal combustion engine of automobile systems 10

dynamics study of an automobile exhaust system diva - Feb 26 2022

web 1 1 automobile exhaust system design an automobile exhaust system has several functions originally it was used for silencing the noise caused by high pressure exhaust gases leaving the engine and for transporting these hot and toxic gases away from the driver s compartment nowadays it is also an important and integral part of

a systems approach to automotive exhaust system development - Nov 06 2022

web jan 18 2003 a design methodology is developed to expedite the mechanical design of an automobile exhaust system the relation between the system design and the component design is defined by a top down

performance exhaust basic principles and design cartechbooks - Jul 02 2022

web the four stroke engine cycle each stroke of the engine cycle has a different effect on the exhaust system to better understand intake and exhaust events in the engine you need to understand the four cycle event which includes the intake stroke compression stroke power stroke and exhaust stroke

design of an automobile exhaust system jetir - Jul 14 2023

web design of an automobile exhaust system jaya prakash swain and a k raghav amity school of engineering technology amity university haryana gurgaon india abstract present day engines are required to have more engine power and are also required to meet the strict pollution standards
