Health Information Systems Adrian Stavert-Dobson,2015-12-21 This is a practical book for health and IT professionals who need to ensure that patient safety is prioritized in the design and implementation of clinical information technology Healthcare professionals are increasingly reliant on information technology to deliver care and inform their clinical decision making Health IT provides enormous benefits in efficiency communication and decision making However a number of high profile UK and US studies have concluded that when Health IT is poorly designed or sub optimally implemented then patient safety can be compromised Manufacturers and healthcare organizations are increasingly required to demonstrate that their Health IT solutions are proactively assured Surprisingly the majority of systems are not subject to regulation so there is little in the way of practical guidance as to how risk management can be achieved The book fills that gap The author a doctor and IT professional harnesses his two decades of experience to characterize the hazards that health technology can introduce Risk can never be eliminated but by drawing on lessons from other safety critical industries the book systematically sets out how clinical risk can be strategically controlled The book proposes the employment of a Safety Case to articulate and justify residual risk so that not only is risk proactively managed but it is seen to be managed These simple techniques drive product quality and allow a technology s benefits to be realized without compromising patient safety

Advances in Informatics, Management and Technology in Healthcare Emmanouil Zoulias,Arie Hasman,Mowafa S. Househ,Marianna Diomidous,Joseph Liaskos,2022-08-15 Data science informatics and technology have inspired health professionals and informaticians to improve healthcare for the benefit of all patients and the field of biomedical and health informatics is one which has become increasingly important in recent years This volume presents the papers delivered at ICIMTH 2022 the 20th International Conference on Informatics Management and Technology in Healthcare held in Athens Greece from 1 3 July 2022 The ICIMTH Conference is an annual scientific event attended by scientists from around the world working in the field of biomedical and health informatics This year thanks to the improvement in the situation as regards the COVID 19 pandemic and the consequent lifting of restrictions the conference was once again a live event but virtual sessions by means of teleconferencing were also enabled for those unable to travel due to local restrictions The field of biomedical and health informatics was examined from a very broad perspective with participants presenting the research and application outcomes of informatics from cell to populations including several technologies such as imaging sensors
