Joint Research Centre,2016 The Atlas describes soil as habitat for the diversity of organisms that live under our feet At the same time it draws attention to the threats to soil biodiversity such as invasive species pollution intensive land use practices or climate change The Atlas provides current solutions for a sustainable management of soils It was coordinated by the JRC and the Global Soil Biodiversity Initiative www.globalsoilbiodiversity.org with more than 70 contributing organisations and several hundred individual contributions It illustrates the diversity of soil organisms explains their geographical and temporal distribution the ecosystem functions and services provided by soil biota Most importantly it draws attention to the myriad of threats to soil biodiversity These include inappropriate land management practices e g deforestation land take for infrastructure development agricultural systems over grazing forest fires and poor water management both irrigation and drainage Other

practices such as land conversion from grassland or forest to cropped land result in rapid loss of soil carbon which indirectly enhances global warming The Atlas shows that mismanaging soils could exacerbate the effects of climate change jeopardise agricultural production compromise the quality of ground water and worsen pollution It also proposes solutions to safeguard soil biodiversity through the development of policies that directly or indirectly target soil health leading to a more sustainable use
