# Effectiveness of simulation-based interprofessional education on teamwork and communication skills in neonatal resuscitation

Shinhye Chae<sup>1,2</sup> and Soonyoung Shon<sup>1\*</sup>

## Abstract

**Background** The role of effective interprofessional teamwork is especially vital in the Neonatal Intensive Care Unit (NICU) where infants facing emergency situations are admitted. Proper neonatal resuscitation, facilitated by comprehensive resuscitation training, can significantly decrease the mortality rates associated with neonatal asphyxia and respiratory failure. This study aimed to develop a simulation-based interprofessional education (IPE) programme for medical staff working in a nursery and NICU and to assess its effectiveness on teamwork, communication skills, clinical performance, clinical judgement, interprofessional attitudes, and education satisfaction.

**Methods** Through a demand survey, neonatal resuscitation was selected as the theme, and an IPE team comprised of one doctor and two nurses was formed. The education programme consisted of three sessions lasting a total of 140 min: two simulation exercises and one theoretical education session. Data were collected from 18 nurses working in the nursery and NICU and 9 doctors working in the paediatrics department.

**Results** A comparison of the metrics before and after applying simulation-based IPE programmes revealed teamwork ( $Z^2=2.67, p=.008$ ), communication skills ( $Z^2=2.68, p=.007$ ), clinical performance ( $Z^2=2.52, p=.012$ ), clinical judgement ( $Z^2=4.52, p<.001$ ), and interprofessional attitude ( $Z^2=3.64, p<.001$ ) to have significantly improved. Education satisfaction scores were 4.73 points on average out of a maximum of 5. The simulation-based IPE programme was effective in improving the teamwork, communication, and clinical performance of resuscitation teams, individual clinical judgement, and interprofessional attitude.

**Conclusions** Simulation-based IPE is effective for enhancing teamwork, team communication, clinical judgement skills, and clinical performance in neonatal resuscitation. This programme has the potential to contribute to the improvement of patient safety and the quality of neonatal care. Additional studies are needed to longitudinally examine the effects of the programme on patient safety and quality of neonatal care.

**Comprehensive Healthcare Simulation: Emergency Medicine** Christopher Strother,Yasuharu Okuda,Nelson Wong,Steven McLaughlin,2021-02-11 This is a practical guide to the use of simulation in emergency medicine training and evaluation It covers scenario building debriefing and feedback and it discusses the use of simulation for different purposes including education crisis resource management and interdisciplinary team training Divided into five sections the book begins with the historical foundations of emergency medicine as well as education and learning theory In order to effectively relay different simulation modalities and technologies subsequent chapters feature an extensive number of practical

scenarios to allow readers to build a curriculum. These simulations include pediatric emergency medicine, trauma, disaster medicine, and ultrasound. Chapters are also organized to meet the needs of readers who are in different stages of their education, ranging from undergraduate students to medical directors. The book then concludes with a discussion on the future and projected developments of simulation training.

**Comprehensive Healthcare Simulation: Emergency Medicine** is an invaluable resource for a variety of learners, from medical students, residents, and practicing emergency physicians to emergency medical technicians and health-related professionals. *Trauma Team Dynamics* Lawrence Marshall Gillman, Sandy Widder, 2025-09-12

The majority of medical errors are non-technical in nature, stemming from faulty decision-making, asynchronous information gathering, lack of situational awareness, and ineffective communication and team leadership. Reviews of accidents from other high-risk industries, including the airline industry, have had similar findings. This led the National Aeronautics and Space Administration (NASA) and the airline industry to develop crew resource management (CRM) training. These team-based training strategies address non-technical skills to counteract human error and improve team and patient safety. Medicine has begun adapting this training, especially within the realms of anesthesia and critical care. Trauma surgery has been slower to utilize this work, however, simulation-based training is increasing in popularity. The first edition of *Trauma Team Dynamics* was a revolutionary book in the field of trauma care. It was the first text that integrated the complexities of trauma care but illustrated how these could be streamlined and improved through a team-based focus and training. CRM and team-based training has grown substantially in the past six years since this text was conceived, and there have been significant developments both in the breadth of the training as well as refinement in the topics covered, teaching methods utilized, and strategies employed to overcome the multitude of challenges still faced in this area. The second edition of this text expands greatly on the initial CRM topics covered in the opening section of the book. Hot topics in CRM training, including the concepts of followership and conflict resolution, and highlights strategies such as mindfulness and others to manage stress and reduce burnout, are discussed. The text also expands into novel areas of trauma care, including less-invasive bedside endovascular treatments such as REBOA (Resuscitative Endovascular Balloon Occlusion of the Aorta) and a more in-depth discussion of tele-resuscitation and trauma care in austere environments. Featuring 28 new chapters, the second edition of *Trauma Team Dynamics* is written by experts in trauma, critical care, emergency medicine, nursing, respiratory therapy, and pre-hospital care, and includes NASA and United States military-affiliated experts. It is intended for use as both a day-to-day clinical resource and a reference text, and includes self-assessment questions as well as guidance on CRM curriculum design and implementation.
