Love in the Time of Algorithms Dan Slater, 2013-01-24 If online dating can blunt the emotional pain of separation if adults can afford to be increasingly demanding about what they want from a relationship the effect of online dating seems positive But what if it's also the case that the prospect of finding an ever more compatible mate with the click of a mouse means a future of relationship instability a paradox of choice that keeps us chasing

the illusive bunny around the dating track It s the mother of all search problems how to find a spouse a mate a date The escalating marriage age and declining marriage rate mean we re spending a greater portion of our lives unattached searching for love well into our thirties and forties It s no wonder that a third of America s 90 million singles are turning to dating Web sites Once considered the realm of the lonely and desperate sites like eHarmony Match OkCupid and Plenty of Fish have been embraced by pretty much every demographic Thanks to the increasingly efficient algorithms that power these sites dating has been transformed from a daunting transaction based on scarcity to one in which the possibilities are almost endless Now anyone young old straight gay and even married can search for exactly what they want connect with more people and get more information about those people than ever before As journalist Dan Slater shows online dating is changing society in more profound ways than we imagine He explores how these new technologies by altering our perception of what s possible are reconditioning our feelings about commitment and challenging the traditional paradigm of adult life Like the sexual revolution of the 1960s and 70s the digital revolution is forcing us to ask new questions about what constitutes normal Why should we settle for someone who falls short of our expectations if there are thousands of other options just a click away Can commitment thrive in a world of unlimited choice Can chemistry really be quantified by math geeks As one of Slater s subjects wonders What s the etiquette here Blending history psychology and interviews with site creators and users Slater takes readers behind the scenes of a fascinating business Dating sites capitalize on our quest for love but how do their creators ideas about profits morality and the nature of desire shape the virtual worlds they ve created for us Should we trust an industry whose revenue model benefits from our avoiding monogamy Documenting the untold story of the online dating industry s rise from ignominy to ubiquity beginning with its early days as computer dating at Harvard in 1965 Slater offers a lively entertaining and thought provoking account of how we have for better and worse embraced technology in the most intimate aspect of our lives

Manufacturing Inhumanity Andrew Spano,2026-03-02 This book focuses on the pathological aetiology of an expanding crisis in culture identity and wellbeing spreading through technologically developed states Emphasis is on the political social linguistic intellectual economic and cultural cost of a largely unquestioned embrace of technocracy that has given rise to what is called here the anthrobot machines imitating humans imitating machines Of particular concern is the dehumanizing effect of this existential mimesis on the collective psyche of what has become a de facto world culture based on consumerism authoritarianism and debt Together these phenomena comprise what this book describes as the psychiatric inversion of the anthrobot which states that the degree to which human functions are emulated by machines is the degree to which machine functions are emulated by humans resulting in increasing cases of personality disorder with psychotic symptoms Supporting these claims is a through and accurate account of the evolution of the concepts theories and technologies involved
