EU and the Balkans Leila Simona Talani, 2020-12-15 Integration and disintegration are the two poles of the economic political and security discourse in an area the Balkans and Southern Eastern Europe SEE which over the past fifteen years has been the stage of dramatic events Integration and disintegration are the two dimensions of an identity problem that many feel the area can solve by joining the European Union and diffusing its many conflicts in the peaceful waters of Europeanisation However quite apart from the obvious point that the accession process cannot be taken for granted in relation to many of the new Balkan countries integration into the EU can be argued as having been and still being a further catalyst for disintegration This book assesses the extent to which the integration of the Balkans into the EU will either foster or discourage the integration of the area itself as well as the winners and losers under this process The book addresses the topic in a multidisciplinary way The contributions are the result of a fruitful co operation between scholars from the Balkans the UK and the US The book tackles the issue of the relation between the EU and the Balkans in all its controversial and contradictory dimensions

The Politics of Local Innovation Hubert Heinelt, Björn Egner, Nikolaos-Komninou Hlepas, 2021-12-30 Some cities manage to mobilize innovation potentials and respond to challenges such as demographic change and immigration as well as economic restructuring while others do not This book solves this problem by answering the following question what are the conditions for the development of local innovation In order to identify these conditions the book explores case study cities which are perceived as success cases of local innovation by the respective local community and sometimes also nationally or internationally The conditions for local innovations are not sought primarily in economic social or institutional circumstances Instead this book focuses on the communicative interactions by which local actors develop locally embedded knowledge or a

specific social imaginary about those circumstances as well as the constraints and opportunities deriving from them The authors focus on a comparative case study of ten cities Bensheim Frankfurt Kassel Leipzig and Offenbach in Germany and Athens Chania Elefsina Kalamata and Thessaloniki in Greece The book is based on content analysis of policy documents and local newspapers as well as in depth interviews with key local actors This book will be of interest to scholars and students of political science and policy analysis as well as sociology geography urban studies and planning It will also interest local politicians and bureaucrats concerned with achieving innovation in cities

Interpretive Social Science Mark Bevir, Jason Blakely, 2018-12-17 In this book Mark Bevir and Jason Blakely set out to make the most comprehensive case yet for an interpretive or hermeneutic approach to the social sciences Interpretive approaches are a major growth area in the social sciences today This is because they offer a full blown alternative to the behavioralism institutionalism rational choice and other quasi scientific approaches that dominate the study of human behavior In addition to presenting a systematic case for interpretivism and a critique of scientism Bevir and Blakely also propose their own uniquely anti naturalist notion of an interpretive approach This anti naturalist framework encompasses the insights of philosophers ranging from Michel Foucault and Hans Georg Gadamer to Charles Taylor and Ludwig Wittgenstein while also resolving dilemmas that have plagued rival philosophical defenses of interpretivism In addition working social scientists are given detailed discussions of a distinctly interpretive approach to methods and empirical research The book draws on the latest social science to cover everything from concept formation and empirical inquiry to ethics democratic theory and public policy An anti naturalist approach to interpretive social science offers nothing short of a sweeping paradigm shift in the study of human beings and society This book will be of interest to all who seek a humanistic alternative to the scientism that overwhelms the study of human beings today
