

# Chapter 2...Population

Demography is the study of population.

Population Geography (Geodemography) is the study of everything about human population, including; density, distribution, fertility, gender, living standard, health, age, nutrition, mortality, mobility.

Total Fertility Rate (TFR) is the average number of children born to a woman in a country. **To keep the country's population at the same number the TFR needs to be 2.1 (Why 2.1? To replace each parent plus plan for some infant death.)**

The highest recorded TFR was 8.1 in Kenya in 1980, while the lowest is presently .80 in Italy. Immigration is not counted in the TFR. Some countries are trying to cut their TFR and population (China) while others are actually trying to increase their population (Russia). Why would they do that? What happens to your country if you have too few people?
