Chapter 3 Section 2 Promoting Growth Stability:

Sustaining High Growth in India Pradeep Agrawal, 2017-11-08 The growth rate of the Indian economy has plummeted sharply from 9 per cent in 2010 to below 5 per cent over 2012-14. It is essential to sustain a growth rate of 8 per cent or more over the next 20 years to eliminate poverty and reach a decent standard of living. There is an urgent need for research on the challenges facing India in reviving and sustaining high rates of economic growth, some of which are related to industrial policy, trade policy, infrastructure bottlenecks, inflation, and macroeconomic issues, governance issues, demography, and human capital. There is also a need for better industrial and human resource policies, higher investment and savings rates, higher exports, and foreign investment inflows. This book studies the importance of growth, the role of industrial policy in sustaining it, and other critical issues regarding ways to revive and sustain higher growth in India across various sectors of the economy.

Monetary Policy and Macroprudential Regulation with Financial Frictions Pierre-Richard Agénor, 2020-11-10 An integrated analysis of how financial frictions can be accounted for in macroeconomic models built to study monetary policy and macroprudential regulation. Since the global financial crisis, there has been a renewed effort to emphasize financial frictions in designing closed and open economy macroeconomic models for monetary and macroprudential policy analysis. Drawing on the extensive literature of the past decade as well as his own contributions in this book, Pierre-Richard Agénor shows how it can itself be a source of aggregate fluctuations, the extent to which central banks should account for financial stability considerations in the conduct of monetary policy, whether national central banks and regulators should coordinate their policies to promote macroeconomic and financial stability, and how much countercyclical macroprudential policies should be coordinated at the international level to mitigate financial spillovers across countries. Productivity Analysis Bela Gold,1955 The Land Use Policy Debate in the United States Judith I. de Neufville,1981-10-31
 Much of the preparation of this book has been generously supported by the Lincoln Institute of Land Policy Cambridge Massachusetts It evolved from a colloquium held in October 1977 under the sponsorship of the Lincoln Institute The three day symposium entitled Land Policy Making the Value Choices involved the preparation of major papers and formal discussions most of which appear here in considerably revised form along with additional pieces commissioned later The colloquium was an idea jointly conceived by myself and Edward Wood a colleague at the time in the Tufts University Program in Urban Social and Environmental Policy We were concerned about two major limitations in the literature and debates over land use On the one hand there was little explicit recognition of the latent values that motivated land use policy On the other there was no common forum where people from the different land use fields could discuss the issues and learn from one another A small group of about two dozen people was invited to the colloquium Each member was a leading spokesman for a different perspective and area of expertise All participated formally in some fashion All the papers were written expressly for the colloquium with the exception of Ann Strong s which was a keynote address to the American Society of Planning Officials earlier in the year None of the papers has been published elsewhere Government Reports Announcements & Index ,1995
