Mine Planning and Equipment Selection 1996 L.A. Ayres de Silva,A.P. Chaves,W.T. Hennies,1996-01-01 A collection of 125 papers on mine planning and selection of equipment covering such topics as design and planning of surface and underground mines planning and equipment selection for difficult mining conditions equipment selection procedures and mine and equipment information systems

Equipment Selection for Mining: With Case Studies Christina N. Burt,Louis Caccetta,2018-03-02 This unique book presents innovative and state of the art computational models for determining the optimal truck loader selection and allocation strategy for use in large and complex mining operations The authors provide comprehensive information on the methodology that has been developed over the past 50 years from the early ad hoc spreadsheet approaches to today s highly sophisticated and accurate mathematical based computational models The authors approach is motivated and illustrated by real case studies provided by our industry collaborators The book is intended for a broad audience ranging from mathematicians with an interest in industrial applications to mining engineers who wish to utilize the most accurate efficient versatile and robust computational models in order to refine their equipment selection and allocation strategy As materials handling costs represent a significant component of total costs for mining operations applying the optimization methodology developed here can substantially improve their competitiveness

Optimization Techniques and their Applications to Mine Systems Amit Kumar Gorai,Snehamoy Chatterjee,2022-09-30 This book describes the fundamental and theoretical concepts of optimization algorithms in a systematic manner along with their potential applications and implementation strategies in mining engineering It explains basics of systems engineering linear programming and integer linear programming transportation and assignment algorithms network analysis dynamic programming queuing theory and their applications to mine systems Reliability analysis of mine systems inventory management in mines and applications of non linear optimization in mines are discussed as well All the optimization algorithms are explained with suitable examples and numerical problems in each of the chapters Features include Integrates operations research reliability and novel computerized technologies in single volume with a modern vision of continuous improvement of mining systems Systematically reviews optimization methods and algorithms applied to mining systems including reliability analysis Gives out software based solutions such as MATLAB AMPL LINDO for the optimization problems All discussed algorithms are supported by examples in each chapter Includes case studies for performance improvement of the mine systems This book is aimed primarily at professionals graduate students and researchers in mining engineering

Mine Planning and Equipment Selection 1995 J. Hadjigeorgiou,A.K. Mehmotra,R. Poulin,R.K. Singhal,1995-10-31 This text presents about 150 papers based on an international symposium on mine planning and equipment selection held in Canada in 1995 Coverage includes design and planning of surface and underground mines surface mining and the environment tailings disposal and slope stability analysis

Underground Ventilation Purushotham Tukkaraja,2023-07-27

Underground Ventilation contains the proceedings of the 19th North American Mine Ventilation Symposium held at the South Dakota School of Mines Technology South Dakota Mines in Rapid City South Dakota June 17 22 2023 South Dakota Mines organized this symposium in collaboration with the Underground Ventilation Committee UVC of the Society for Mining Metallurgy Exploration SME The Mine Ventilation Symposium series has always been a premier forum for ventilation experts practitioners educators students regulators and suppliers from around the world to exchange knowledge ideas and opinions Underground Ventilation features sixty seven selected technical papers in a wide range of ventilation topics including auxiliary and primary systems mine fans case studies computational fluid dynamics applications diesel particulate control electric machinery mine cooling and refrigeration mine dust monitoring and control mine fires and explosion prevention mine gases mine heat mine ventilation and automation occupational health and safety renewable alternative energy monitoring and measurement network analysis and optimization and planning and design

Decision Intelligence Miriam O'Callaghan, 2023-04-26 Revealing the limitations of human decision making this book explores how Artificial Intelligence AI can be used to optimize decisions for improved business outcomes and efficiency as well as looking ahead to the significant contributions Decision Intelligence DI can make to society and the ethical challenges it may raise From the theories and concepts used to design autonomous intelligent agents to the technologies that power DI systems and the ways in which companies use decision making building blocks to build DI solutions that enable businesses to democratize AI this book presents an impressive framework to integrate artificial and human intelligence for the success of different types of business decisions Replete with case studies on DI applications as well as wider discussions on the social implications of the technology Decision Intelligence Human Machine Integration for Decision Making appeals to both students of AI and data sciences and businesses considering DI adoption
