*JPA 2* Mike Keith, Merrick Schincariol, 2013-09-24 Pro *JPA 2* Second Edition introduces, explains, and demonstrates how to use the new Java Persistence API *JPA 2.1* from the perspective of one of the specification creators. A one-of-a-kind resource, it provides both theoretical and extremely practical coverage of *JPA* usage for both beginning and advanced developers. Authors Mike Keith and Merrick Schincariol take a hands-on approach based on their wealth of experience and expertise by giving examples to illustrate each concept of the API and showing how it is used in practice. The examples use a common model from an overriding sample application, giving readers a context from which to start and helping them to understand the examples within an already familiar domain. After completing the book, you will have a full understanding of *JPA* and be able to successfully code applications using its annotations and APIs. The book also serves as an excellent reference guide during initial and later *JPA* application experiences.

Hands-on examples for all aspects of the *JPA* specification  
Expert insight about various aspects of the API and when they are useful  
Portability hints to provide increased awareness of the potential for non-portable *JPA* code  
What you'll learn  
How to get started with enterprise applications using *JPA 2.1*  
Simple and advanced object relational mapping techniques  
How to use the complete Entity Manager API  
How to create queries using the query language JPQL and the Criteria API  
Locking, concurrency, and other advanced concepts  
How to use XML mapping files and descriptors  
How to package and deploy your Java Persistence applications  
How to test your Java Persistence applications  
Who this book is for  
The book generally targets enterprise and persistence developers who fall in one of three categories:  
Those who are new to persistence: we will offer an introduction to persistence and to the basic concepts so these readers can have a solid base from which to become proficient at *JPA*.  
Those who know and/or use existing ORM persistence products such as Hibernate or TopLink EclipseLink.  
Those who have already used *JPA* and want to learn about newer features introduced by *JPA 2.1* or have a good reference book to consult when they develop *JPA* applications. In general, we assume that the reader is knowledgeable with Java SQL and JDBC and has a little knowledge of Java EE.

**Data Structures in Java** Thomas A. Standish, 1998 Using Java TM 1.1 Professor Thomas A. Standish teaches the fundamentals of data structures and algorithms. With this exciting new language, Standish takes a fresh look at the subject matter. New challenges arise any time a new language is used, and the author meets these challenges. For example, although Java is a language without explicit pointers, this book offers pointer diagrams to help students visualize, reason about, and understand this major Data Structures topic. Standish's clear presentation helps readers tie the many concepts of data structures together with recurring themes. Central ideas such as modularity, levels of abstraction, efficiency, and tradeoffs serve as integrators in the book in order to tie the material together conceptually and to reveal its underlying unity and

interrelationships Highlights Reviews the fundamentals of object oriented programming and Java in Chapter 2 and Appendix A allowing students with no prior knowledge of Java to get up and running quickly Creates a Java applet with a simple GUI in Chapter 2 Covers recursion early and carefully in Chapter 4 to help students grasp this challenging concept Includes an introduction to modularity and data abstraction concepts in Chapter 5 and coverage of key software engineering concepts and skills in Appendix C Contains common pitfall sections at the end of each chapter to help students recognize and avoid potential dangers Instructor s materials are available from your sales rep If you do not know your local sales representative please call 1 800 552 2499 for assistance or use the Addison Wesley Longman rep locator at <http://hepgawl.com> rep locator 020130564XB04062001
