**Proceedings of the International Conference on Marching Beyond the Libraries: Talent, Technology, and Transformation (ICMBL 2025)** Bijayalaxmi Rautaray, Dillip K. Swain, Chandrakanta Swain, 2026-04-27 This is an open access book. Talent It's high time for LIS researchers to focus on talent management with the objective of influencing library and information management by addressing the key facets of talent management such as talent management strategies, importance of career development, evaluation of talented employees, and organizational resilience. The theme underscores the need for organizations to adopt proper talent management strategies to, in the wake of establishing creative environments, promote innovative programming and engage users in new and exciting ways. Technology It is the need of the hour for libraries to adopt latest information communication technologies in the practice of librarianship to establish connectivity with the users' community round the clock through social media platforms transcending beyond the physical space of library through innovative library services to meet the evolving needs of users. The conference theme delves into groundbreaking approaches to library services including the implementation of emerging technologies, data analytics, and the development of user-centric services for ensuring healthy connectivity with the users by closing the gap of digital divide. Transformation Modern Library and information science has transcended beyond the conventional practice of storing and disseminating information and knowledge. Libraries are no longer confined to being mere repositories of books and documents; they have become dynamic spaces that encourage continuity in adopting latest information technologies into the practice of librarianship through creativity, innovation, and intellectual exploration in a continuous and forward-looking manner for meeting the timely information needs of students, research scholars, and teachers. This Conference theme serves as a rallying call for the global library community to reflect on its role in society and chart a course towards a future characterized by talent, technology, and transfer for ensuring innovative services to the users' community. Participants can anticipate engaging discussions, valuable insights, and collaborative opportunities that will shape the future of libraries in the 21st century.

**2002 IEEE International Conference on Data Mining** Vipin Kumar, 2002 Consists of 72 full papers and 49 short papers from the December 2002 conference on the design, analysis, and implementation of data mining theory, systems, and applications. Topics of the full papers include evolutionary time series segmentation for stock data mining, cluster merging, and splitting. Ethics in Online AI-Based Systems Santi Caballé, Joan Casas-Roma, Jordi Conesa, 2024-04-10 Recent technological advancements have deeply transformed society and the way people interact with each other. Instantaneous communication platforms have allowed connections with other people, forming global communities and creating unprecedented opportunities in many sectors, making access to online resources more ubiquitous by reducing limitations imposed by geographical distance and temporal constraints. These technological developments bear ethically relevant consequences with their deployment, and legislations often lag behind such advancements. Because the appearance and

deployment of these technologies happen much faster than legislative procedures the way these technologies affect social interactions have profound ethical effects before any legislative regulation can be built in order to prevent and mitigate those effects Ethics in Online AI Based Systems Risks and Opportunities in Current Technological Trends features a series of reflections from experts in different fields on potential ethically relevant outcomes that upcoming technological advances could bring about in our society Creating a space to explore the ethical relevance that technologies currently still under development could have constitutes an opportunity to better understand how these technologies could or should not be used in the future in order to maximize their ethically beneficial outcomes while avoiding potential detrimental effects Stimulating reflection and considerations with respect to the design deployment and use of technology will help guide current and future technological advancements from an ethically informed position in order to ensure that tomorrow such advancements could contribute towards solving current global and social challenges that we as a society have today This will not only be useful for researchers and professional engineers but also for educators policy makers and ethicists Investigates how intelligent technological advances might be used how they will affect social interactions and what ethical consequences they might have for society Identifies and reflects on questions that need to be asked before the design deployment and application of upcoming technological advancements aiming to both prevent and mitigate potential risks as well as to identify potentially ethically beneficial opportunities Recognizes the huge potential for ethically relevant outcomes that technological advancements have and take proactive steps to anticipate that they be designed from an ethically informed position Provides reflections that highlight the importance of the relationship between technology their users and our society thus encouraging informed design and educational and legislative approaches that take this relationship into account *Advances in*
