This book will take you from the basics of D3.js so that you can create your own interactive visualizations to creating the most common graphs that you will encounter as a developer, scientist, statistician, or data scientist. The book begins with an overview of SVG, the basis for creating two-dimensional graphics in the browser. Once the reader has a firm understanding of SVG, we will tackle the basics of how to use D3.js to connect data to our SVG elements. We will start with a scatter plot that maps run data to circles on a graph and expand our scatter plot to make it interactive. You will see how you can easily allow the users of your graph to create, edit, and delete run data by simply dragging and clicking the graph. Next, we will explore creating a bar graph using external data from a mock API. After that, we will explore animations and motion with a bar graph and use various physics-based forces to create a force-directed graph. Finally, we will look at how to use GeoJSON data to create a map. What you will learn: Build a scatter plot, Build a bar graph, Build a pie chart, Build a force-directed graph, Build a map, Build interactivity into your graphs.
