Focused Observations Gaye Gronlund, Marlyn James, 2005 An early childhood teacher's introduction to using observational assessment in the classroom

Curriculum Planning Forrest W. Parkay, 1993 The seventh edition of Curriculum Planning is a collection of readings that presents the knowledge, skills, and alternative strategies needed by curriculum planners and teachers at all levels of education from early childhood through adulthood. The book offers a variety of learning experiences for students with wide-ranging interests, learning styles, and backgrounds. Made up of ten chapters, the first six emphasize the development of knowledge and skills in the four bases of the curriculum: social forces, human development, learning, and knowledge and cognition. The last four chapters emphasize the application of curriculum planning skills for educational programs for children, early middle and late adolescents, and adult and senior learners. At all levels, current issues, innovations, and trends are examined from both theoretical and practical viewpoints.

Developmentally Appropriate Curriculum in Action Marjorie J. Kostelnik, Anne Soderman, Michelle Ruppier, Alice Whiren, 2013-04-29 Written for courses in Curriculum in Early Childhood Education and Methods for Teaching Young Children in Preschool and Kindergarten. A comprehensive overview of all the components necessary to run an effective early childhood program as a teacher, this concise new text is keenly focused on application and skill building, utilizing several

areas of child development aesthetic affective cognitive language physical and social as the basis for curriculum planning Neither a subject based nor a materials based curriculum this directly applicable text instead promotes several areas of child development and incorporates subject matter areas art math literacy and science into the developmental domains rather than focusing on the subjects themselves The authors present six activity types exploratory play guided discovery problem solving discussions demonstrations and direct instruction in every domain Furthermore they provide long form lesson plans and short form plans that illustrate these activity types in all of the curriculum chapters Closely aligned to the current developmentally appropriate practice DAP guidelines the text effectively prepares pre service teachers for the Praxis II exam if it is required in their state Promoting the teacher as an active participant in education is another important characteristic of the text with a detailed discussion of the importance of being intentional in one s teaching and what this looks like in a true classroom environment The authors support this ideology by explaining and showing how a teacher becomes more active one ready to make continual judgments about what to plan how to build on children s interests and knowledge and how to interact with children to scaffold their learning Strongly methods based in its approach the text also imparts the how to of teaching with a plethora of examples as to what is appropriate to teach children ages three to six years of age
