Wearable Sensors and Robots Canjun Yang, G. S. Virk, Huayong Yang, 2016-09-30 These proceedings present the latest information on regulations and standards for medical and non medical devices including wearable robots for gait training and support design of exoskeletons for the elderly innovations in assistive robotics and analysis of human machine interactions taking into account ergonomic considerations The rapid development of key mechatronics technologies in recent years has shown that human living standards have significantly improved and the International Conference on Wearable Sensor and Robot was held in Hangzhou China from October 16 to 18 2015 to present research mainly focused on personal care robots and medical devices The aim of the conference was to bring together academics researchers engineers and students from across the world to discuss state of the art technologies related to various aspects of wearable sensors and robots div

Intelligent Circuits and Systems for SDG 3 - Good Health and well-being Bhaveshkumar Choithram Dharman, Suman Lata Tripathi, 2024-08-05 ICICS is a series of conferences initiated by School of Electronics and Electrical Engineering at Lovely Professional University Looking at the response to the conference the bi annual conference now onwards will be annual The 5th International Conference on Intelligent Circuits and Systems ICICS 2023 will be focusing on intelligent circuits and systems for achieving the targets in Sustainable Development Goal SDG 3 identified as Good Health and Wellbeing by United Nations Refs <https://sdgs.un.org/goals/goal3> <https://sdg-tracker.org> **Information Technology - New Generations**

Shahram Latifi, 2017-07-15 This volume presents a collection of peer reviewed scientific articles from the 14th International Conference on Information Technology New Generations held at the University of Nevada at Las Vegas on April 10 12 at Tuscany Suites Hotel in Las Vegas The Book of Chapters addresses critical areas of information technology including web technology communications computing architectures software engineering security and data mining Handbook of Research on the Internet of Things Applications in Robotics and Automation Singh, Rajesh, Gehlot, Anita, Jain, Vishal, Malik, Praveen Kumar, 2019-09-13 With near universal internet access and ever advancing electronic devices the ability to facilitate interactions between various hardware and software provides endless possibilities Though internet of things IoT technology is becoming more popular among individual users and companies more potential applications of this technology are being sought every day There is a need for studies and reviews that discuss the methodologies concepts and possible problems of a technology that requires little or no human interaction between systems The Handbook of Research on the Internet of Things Applications in Robotics and Automation is a pivotal reference source on the methods and uses of advancing IoT technology While highlighting topics including traffic information systems home security and automatic parking this book is ideally designed for network analysts telecommunication system designers engineers academicians technology specialists practitioners researchers students and software developers seeking current research on the trends and functions of this life changing technology Computational Intelligence in Surveillance Systems Using Image Processing Jay Kumar

Pandey, Mritunjay Rai, Momina Shaheen, Faizan Ahmad, 2026-03-07 Traditional surveillance systems struggle to process large volumes of visual data identify specific objects or behaviors and adapt to dynamic environments Computational intelligence which encompasses techniques like artificial intelligence AI machine learning ML and computer vision offers powerful tools to address these challenges by enabling automated analysis pattern recognition and decision making based on visual data Computational Intelligence in Surveillance Systems Using Image Processing addresses the unique challenges and ethical considerations of applying AI and ML offering a nuanced understanding of the regulatory landscape It provides insights into the responsible development and deployment of technologies to unlock the transformative potential of computational intelligence to revolutionize surveillance systems and advance the capabilities of security and monitoring across various sectors Discusses emerging trends potential challenges and areas for future research providing a roadmap for scholars looking to contribute to the evolving field of image processing Explains how AI and ML algorithms can be applied to analyze and interpret visual data captured by surveillance cameras Considers the challenges and considerations associated with deploying computational intelligence in surveillance including privacy concerns ethical considerations and technical limitations Explores specific use cases and applications where computational intelligence can enhance surveillance capabilities such as object detection activity recognition anomaly detection and predictive analytics **IoT and Smart**

Devices for Sustainable Environment Mourade Azrou, Azeem Irshad, Rajasekhar Chaganti, 2022-02-02 This book presents research related to smart devices and Internet of Things IoT that are intended to advance environmental sustainability With sustainability as the focus the topics covered include designing and controlling of smart systems networking and machine learning monitoring and controlling the environment smart metering authentication and authorization and software and systems solution The authors discuss how IoT can aid in sustainability through its implementation of systems interconnecting several objects whether in the physical or in the virtual worlds The chapters also present several applications including in smart homes transportation and healthcare The book pertains to researchers academics and professionals *HCI*
