

# Hybrid Annuity Model (HAM) for PPP Projects

---

*Ajit V Patwardhan*

*In India, road projects are awarded via one of the three models: Build-Operate-Transfer (BOT)-Annuity, BOT-Toll, and EPC (engineering, procurement and construction) contract. After the BOT model of Public Private Partnership (PPP), an advanced version of the Model Concession Agreement (MCA), presently called as Hybrid Annuity Model (HAM) is paving way for road projects. The hybrid model is supposed to be a win-win situation for the government and developers. The government is expected to fund up to 40 percent of the project cost while the remaining 60 per cent to be funded by the private player, and thus easing the financial burden on the exchequer as well. This comes as a welcome step in the situation of dismal performance of highway construction projects awarded under MCA. This paper summarises the key changes and features which are brought under the new arrangement and provides a comparison with past models.*

**Ajit V Patwardhan** is renowned infrastructure contract expert with about 45 years of experience in India and abroad, in various fields of construction Projects and Infrastructure Development including training and consultancy. Prof Vivek Date, who is an expert on Financial Risk Analysis of BOT Projects also contributed in writing this paper.
