

Scientific research and Indigenous Knowledge

Community leadership and participation are increasing in scientific research and monitoring across Inuit Nunangat

Inuit Knowledge informs Western science, leading to a more holistic understanding of the environment and culturally important species, including Arctic char, beluga, and seals.

Inuit participation in the publication of information from coastal and marine studies is increasing.

Efforts to bridge different ways of knowing to address ecological and social challenges associated with climate change have increased.

Community technicians use different technologies and tools to gather data on the Arctic environment and species.

Indigenous Knowledge Research Questionnaire:

Promoting sustainable local economic development initiatives Marius Venter, 2022 This book endeavours to outline case studies that promote sustainable Local Economic Development LED initiatives It is generally believed that local governments are the foot soldiers of LED However this seems to be a myth as local governments in South Africa and elsewhere have not yet fulfilled this mandate and have been struggling for several years to implement LED initiatives The distinctive merit of this book lies in the way it combines the South African context with the wider international development context in ways that there is a flow of information and ideas both ways The book is an essential part of this sequence of ideas development and action at a critical time for strategic action directed at a sustainable future It showcases case studies and responses to the impacts of globalisation as a bridge between urban rural and institutional action and reveals avenues for local government leadership in communities research student engagement and wider interactions

Contemporary Issues in African Sciences and Science Education Akwasi Asabere-Ameyaw, George J. Sefa Dei, Kolawole Raheem, 2012-09-05 In this careful articulation of science the editors provide an intellectual marriage of Indigenous science and science education in the African context as a way of revising schooling and education They define science broadly to include both the science of the natural physical biological and the science of the social It is noted that the current policy direction of African education continues to be a subject of intense intellectual discussion Science education is very much at the heart of much current debates about reforming African schooling Among

the ways to counter vision contemporary African education this book points to how we promote Indigenous science education to improve upon African science and technology development in general The book also notes a long standing push to re examine local cultural resource knowings in order to appreciate and understand the nature content and context of Indigenous knowledge science as a starting foundation for promoting African science and technology studies in general It is argued that these interests and concerns are not mutually exclusive of each other but as a matter of fact interwoven and interdependent The breadth of coverage of the collection reflect papers in science Indigeneity identity and knowledge production and the possibilities of creating a truly African centred education It is argued that such extensive coverage will engage and excite readers on the path of what has been termed African educational recovery While the book is careful in avoiding stale debates about the Eurocentricity of Western scientific knowledge and the positing of Eurocentric science as the only science worthy of engagement it nonetheless caution against constructing a binary between Indigenous local science and knowledges and Western scientific knowledge After all Western scientific knowledge is itself a form of local knowledge born out of a particular social and historical context Engaging science in a more global context will bring to the fore critical questions of how we create spaces for the study of Indigenous science knowledge in our schools How is Indigenous science to be read understood and theorized And how do educators gather collect and interpret Indigenous science knowledges for the purposes of teaching young learners These are critical questions for contemporary African education

Food for Thought Wim Hiemstra,Bertus Haverkort,1999 This book presents new insights about the knowledge systems of rural people It goes beyond the technical knowledge embodied in traditional farming land use and health practices by dealing with their underlying ancient worldviews and cosmovisions It draws some general conclusions about the holistic nature strengths and also limitations of these bodies of knowledge and describes how in various countries in Asia Africa Latin America and Europe some development agencies are supporting rural people and their traditional leaders in carrying out practical experiments based on local concepts A framework for such on farm experiments and ideas for a methodology for supporting endogenous development is presented The contributors neither romanticise traditional knowledge nor reject Western science Rather they argue that a reciprocal relationship between these sources of knowledge can be beneficial for rural development Rural people researchers and development organizations are challenged to look for the sources of knowledge most appropriate to the specific ecological social and cultural context *Economic Development, Institutions, and Technique Change* Kimberly Anne Swallow,1996 **Ikorok** ,2012
