Networks '98: Ieee Sicon'98: Proceedings Of The 6th Ieee Singapore International Conference Akkihebbal L Ananda, Hung Keng Pung, Weiguo Wang, 1998-06-22 This book is aimed at scientists technologists engineers and undergraduate and graduate students involved in analytical and process biochemistry and biotechnology It reviews the potentialities of light emitting reaction associated with the sensor approach The book introduces the concepts of sensors and biosensors and places bio and chemi luminescent sensors in the general context of biosensors It then briefly describes luminescence phenomena and provides some basic knowledge necessary for understanding and exploiting light emitting reactions These luminescence reactions important from an analytical standpoint are described Also the applications of bio and chemi luminescence which make use of immobilized reagents are explained Finally there is discussion of bio and chemi luminescent sensors most of them including fiber optics Parallel and Distributed Processing and Applications Jiannong Cao, Laurence T. Yang, Minyi Guo, Francis Lau, 2005-01-17

Welcome to the proceedings of the 2nd International Symposium on Parallel and Distributed Processing and Applications ISPA2004 which was held in Hong Kong China 13 15 December 2004 With the advance of computer networks and hardware technology parallel and distributed processing has become a key technology which plays an important part in determining future research and development activities in many academic and industrial branches It provides a means to solve computationally intensive problems by improving processing speed It is also the only approach to building highly reliable and inherently distributed applications ISPA2004 provided a forum for scientists and engineers in academia and industry to exchange and discuss their experiences new ideas research results and applications about all aspects of parallel and distributed computing There was a very large number of paper submissions 361 from 26 countries and regions including not only Asia and the Pacific but also Europe and North America All submissions were reviewed by at least three program or technical committee members or external reviewers It was extremely difficult to select the presentations for the conference because there were so many excellent and interesting submissions In order to allocate as many papers as possible and keep the high quality of the conference we finally decided to accept 78 regular papers and 38 short papers for oral technical presentations We believe that all of these papers and topics not only provide novel ideas new results work in progress and state of the art techniques in this field but also stimulate the future research activities in the area of parallel and distributed computing with applications **Smart Technologies in Healthcare Management** Nidhi Sindhwani, Sarvesh Tanwar, Ajay Rana, Ramani Kannan, 2024-06-28 Offering a holistic view of the pioneering trends and innovations in smart healthcare management this book focuses on the methodologies frameworks design issues tools architectures and technologies necessary to develop and understand intelligent healthcare systems and emerging applications in the present era Smart Technologies in Healthcare Management Pioneering Trends and Applications provides

an overview of various technical and innovative aspects challenges and issues in smart healthcare along with recent and novel findings It highlights the latest advancements and applications in the field of intelligent systems and explores the importance of cloud computing and the design of sensors in an IoT system The book offers algorithms and a framework with models in machine learning and AI for smart healthcare management A detailed flow chart and innovative and modified methodologies related to intelligent computing in healthcare are discussed as well as real world based examples so that readers can compare technical concepts with daily life concepts This book will be a useful reference for academicians and the healthcare industry along with professionals interested in exploring innovations in varied applicational areas of AI IoT and machine learning Researchers startup companies and entrepreneurs will also find this book of interest

Mobile Computing, 2E Asoke K. Talukdar, 2010-07-10 Mobile Computing technology addresses challenges that enable the realization of the global village concept where people can seamlessly access any information from anywhere through any device while stationary or even at a state of mobility This book covers all the communication technologies starting from First Generation to Third Generation cellular technology wireless LAN WiFi and wireless broadband WiMax It covers intelligent networks IN and emerging technologies like mobile IP IPv6 and VoIP Voice over IP Written by a professional who has worked on several technologies the book is replete with illustrations examples programs interesting asides and much more A storehouse of the most recent developments in the world of wireless the book aims to fulfill the growing information and knowledge needs of a vast segment of interested audience students professionals teachers and even non technical people Since it provides the big picture of all the technologies from CTI computer technology interface to 3G third generation including Bluetooth IN WiFi and WiMax as well as the service creation aspects the book will be an indispensable repository of contemporary developments in the ever expanding field of wireless services and mobile computing

Opportunistic Networks Anshul Verma, Pradeepika Verma, Sanjay Kumar Dhurandher, Isaac Woungang, 2021-08-18 The opportunistic network is an emerging and recent area of research To make this research area more adaptable for practical and industrial use there is a need to further investigate several research challenges in all aspects of opportunistic networks Therefore *Opportunistic Networks Fundamentals Applications and Emerging Trends* provides theoretical algorithmic simulation and implementation based

research developments related to fundamentals applications and emerging research trends in opportunistic networks The book follows a theoretical approach to describe fundamentals to beginners and incorporates a practical approach depicting the implementation of real life applications to intermediate and advanced readers This book is beneficial for academicians researchers developers and engineers who work in or are interested in the fields related to opportunistic networks delay tolerant networks and intermittently connected ad hoc networks This book also serves as a reference book for graduate and postgraduate courses in computer science computer engineering and information technology streams Advances in Multimedia Information Processing — PCM 2002 Yung-Chang Chen, Long-Wen Chang, Chiou-Ting Hsu, 2003-08-03 This book constitutes the refereed proceedings of the Third IEEE Pacific Rim Conference on Multimedia PCM 2002 held in Hsinchu Taiwan in December 2002 The 154 revised full papers presented were carefully reviewed and selected from 224 submissions The papers are organized in topical sections on mobile multimedia digital watermarking and data hiding motion analysis multimedia retrieval techniques image processing multimedia security image coding multimedia learning audio signal processing wireless multimedia streaming multimedia systems in the Internet distance education and multimedia Internet security computer graphics and virtual reality object tracking face analysis and MPEG 4

Robotics and Automation in Industry 4.0 Nidhi Sindhvani, Rohit Anand, A. George, Digvijay Pandey, 2024-02-09 The book presents the innovative aspects of smart industries and intelligent technologies involving Robotics and Automation It discusses the challenges in the design of autonomous robots and provides an understanding of how different systems communicate with each other allowing cooperation with other human systems and operators in real time Robotics and Automation in Industry 4 0 Smart Industries and Intelligent Technologies offers research articles flow charts algorithms and examples based on daily life in automation and robotics related to the building of Industry 4 0 It presents disruptive technology applications related to Smart Industries and talks about how robotics is an important Industry 4 0 technology that offers a wide range of capabilities and has improved automation systems by doing repetitive tasks with more accuracy and at a lower cost The book discusses how frontline healthcare staff can evaluate monitor and treat patients from a safe distance by using robotic and telerobotic systems to minimize the risk of infectious disease transmission Artificial intelligence AI and machine learning ML are looked at and the book offers a comprehensive overview of the key challenges surrounding the Internet of Things IoT and AI synergy including current and future applications with significant societal value An ideal read for scientists research scholars entrepreneurs industrialists academicians and various other professionals who are interested in exploring innovations in the applicational areas of AI IoT and ML related to Robotics and Automation
