International Handbook of Blockchain Law Thomas Richter, Matthias Artzt, 2024-08-14 Blockchain's significant advances since 2020 including a plethora of new use cases have necessitated a comprehensive revision of the first edition of this matchless resource. While new chapters and topics have been added, the handbook still follows the systematic and structured approach of the first edition. Each contributor, all of them practitioners experienced with blockchain projects within their respective areas of expertise and specific jurisdictions, elucidates the implications of blockchain technology and related legal issues under such headings as the following: understanding blockchain from a technological point of view; regulatory aspects of blockchain; smart contracts; data privacy; capital markets; crypto asset regulation in Europe, the UK, and the US; intellectual property and antitrust law. The foundational chapter on the technical aspects of blockchain technology has been meticulously expanded to elucidate the proof of stake consensus mechanism alongside fresh insights into the ERC 721 Token Standard for non-fungible tokens, decentralized exchanges, staking, stablecoins, and central bank digital currencies. As blockchain law cements itself as a distinct legal field, this new edition is poised to be an invaluable asset for legal practitioners in-house lawyers, IT professionals, consultancy firms, blockchain associations, and legal scholars. At a depth that allows non-IT experts to understand the groundwork for legal assessments, the handbook provides those charting the dynamic waters of this field of law with a compass ensuring they are well equipped to tackle the legal issues raised by the usage of blockchain technology.

Handbook of Blockchain in Public Governance Evrim Tan, 2026-02-16 This Handbook connects blockchain innovation with the discipline and practice of public governance. Drawing on the expertise and perspectives of diverse academic communities and practitioners, it provides insights on managing, utilizing, regulating, and governing blockchain in this context. This title contains one or more Open Access chapters.

Construction 4.0 Anil Sawhney, Michael Riley, Javier Irizarry, 2020-02-06 Modelled on the concept of Industry 4.0, the idea of Construction 4.0 is based on a confluence of trends and technologies that promise to reshape the way built environment assets are designed, constructed, and operated. With the pervasive use of Building Information Modelling (BIM), lean principles, digital technologies, and offsite construction, the industry is at the cusp of this transformation. The critical

challenge is the fragmented state of teaching research and professional practice in the built environment sector This handbook aims to overcome this fragmentation by describing Construction 4.0 in the context of its current state emerging trends and technologies and the people and process issues that surround the coming transformation Construction 4.0 is a framework that is a confluence and convergence of the following broad themes discussed in this book Industrial production prefabrication 3D printing and assembly offsite manufacture Cyber physical systems actuators sensors IoT robots cobots drones Digital and computing technologies BIM video and laser scanning AI and cloud computing big data and data analytics reality capture Blockchain simulation augmented reality data standards and interoperability and vertical and horizontal integration The aim of this handbook is to describe the Construction 4.0 framework and consequently highlight the resultant processes and practices that allow us to plan design deliver and operate built environment assets more effectively and efficiently by focusing on the physical to digital transformation and then digital to physical transformation This book is essential reading for all built environment and AEC stakeholders who need to get to grips with the technological transformations currently shaping their industry research and teaching [Commerce Business Daily](#) ,1999-05
