project manager for your client's security project. The security project would start by discussing the scope of work with your client. The most important meeting between you and the client would be the initial goal setting and policy review meeting. Senior management is going to get involved and you are going to act as the facilitator. From this meeting you become aware of the level of risk your client is willing to assume and accept. Your work would then start from there. When working on a project it is important to understand the background and operation of the client. You also want to know what you are up against. Protection against vandalism is totally different from protection against terrorist attack. A CPP is more on the planning and management side of security. A security guard professional on the other hand is to provide client with professional protective services. It is believed that the CPP certification is more general in nature while the PSP certification is way more specific and in depth in physical security. To summarize the major knowledge areas include Security Principles and Theories, Business Principles, Personnel Security, Physical Security, Information Security, Crisis Management, Investigations, Legal Matters. We give you knowledge information relevant to the exam specification. To be able to succeed in the real exam you'll need to apply your earned knowledge to the question scenarios. Many of the exam questions are written to be less straight forward. They tend to be framed within the context of short scenarios. An advice: Do NOT rely on a single source for exam preparation. To secure exam success always use multiple sources and read as much as possible. [The Guide to National Professional Certification Programs](#) Philip M. Harris, 2001.
