The McDonaldization of Higher Education Dennis Hayes, Robin Wynyard, 2002-08-30 Where not so long ago professors owned the tools of scholarship controlled the labor process and certified the quality of our product the process of McDonaldization has torn this relation asunder Rapidly increasing student faculty ratios mass classes and the use of low wage teaching assistants and adjunct faculty have changed the job of professor pp 64 ff Faculty are pressured to recruit and retain students seen as customers p 67 and to compete with private for profit End Page 368 universities pp 71 72 With declining government aid for higher education students increasingly see education as a form of consumption and demand control choice and edutainment p 64 and elsewhere This is seen most obviously in course evaluations which some of the authors refer to as customer satisfaction surveys pp 36 132 147 At the same time faculty are relentlessly pushed to publish engage in funded research and develop new technological competencies Control over product is threatened as universities make demands on ownership of intellectual property including patents and licenses publications and courseware pp 79 81 From the perspective of faculty McDonaldization represents a dramatic loss of pedagogical authority Simultaneously the state which still pays for much of the cost of education as a public good is increasing demands for accountability and standards This takes the form of schemes for standardizing promotion and tenure quantifying and measuring the product being delivered and attempting to assure quality
