Shih, Tai-hoon Kim, Byeong-Ho Kang, 2010-05-10 As future generation information technology FGIT becomes specialized and fragmented it is easy to lose sight that many topics in FGIT have common threads and because of this advances in one discipline may be transmitted to others Presentation of recent results obtained in different disciplines encourages this interchange for the advancement of FGIT as a whole Of particular interest are hybrid solutions that combine ideas taken from multiple disciplines in order to achieve something more significant than the sum of the individual parts Through such hybrid philosophy a new principle can be discovered which has the propensity to propagate throughout multifaceted disciplines FGIT 2009 was the first mega conference that attempted to follow the above idea of hybridization in FGIT in a form of multiple events related to particular disciplines of IT conducted by separate scientific committees but coordinated in order to expose the most important contributions It included the following international conferences Advanced Software Engineering and Its Applications ASEA Bio Science and Bio Technology BSBT Control and Automation CA Database Theory and Application DTA Disaster Recovery and Business Continuity DRBC published independently Future Generation Communication and Networking FGCN that was combined with Advanced Communication and Networking ACN Grid and Distributed Computing GDC Multimedia Computer Graphics and Broadcasting MulGraB Security Technology SecTech Signal Processing Image Processing and Pattern Recognition SIP and e Service Science and Technology UNESST

On Raising a Digital Human Norman I. Badler, 2024-09-20 This book tells the story of building digital virtual human models in the context of the background choices and occurrences that shaped the author's own involvement and personal evolution Such digital models found motivating applications in engineering anthropology medical and group simulation problems and numerous connections to other disciplines informed and enriched their design development and deployment This personal perspective on developments in the field is enhanced by extensive citations that provide pointers into relevant literature recognize the contributions of co authors and collaborators and give external evidence for claims Both academic and corporate interest in virtual beings has exploded in recent years and while this book does not survey the current state of the art it is an essential window into how the field arrived where it is today The technical discussions throughout the book are deliberately accessible with extensive references to the literature for further reading This book will be of interest to readers who want to understand the history of virtual human beings how they evolved and especially how they must address numerous human characteristics to achieve any sense of humanness
