*Qualification for Computer-Integrated Manufacturing* Felix Rauner, 2012-12-06 In this paper a nearly perfected concept of basic training in the field of Computer Integrated Manufacturing CIM has been explained With the help of detailed studies conducted in part by the Department of Technology and Education Department of Mechanical and Industrial Engineering University of Dortmund the necessity of basic training at all levels for employees in Computer Integrated Manufacturing was verified Then the new requirements for employees were indicated with respect to the ability to act Moreover the didactic demands of the concept for basic subject specific training were clearly stipulated In summary this concept has to include the invariant indispensable fundamental and exemplary contents and the basic options of CIM work organisation which are most important today and in the near future Then a configuration was presented to meet these demands the multimedia system of the CIM Learning Factory subsidised by the EC in the COMETT programme The CIM Learning Factory consists of a well operating model factory where activities like job management production control design manufacturing including loading material transport and assembly as well as quality control and warehousing are flexibly shown in functional models and are controlled by means of cross linked computers MPC during the training the cross linked computer structure is used like a language laboratory two different teachware packages the first for the target group of designers and decision makers the second for skilled workers and plant management

Computer Integrated Manufacturing (Iccim '91): Manufacturing Enterprises Of The 21st Century - Proceedings Of The International Conference B S Lim, 1991-10-02 In the 21st century computer integrated manufacturing CIM systems will not only be the economic development tools but will also be the essential means of achieving a higher level of flexibility cohesiveness and performance CIM systems are beginning to settle into our society and industries with greater emphasis on the integration of economic cultural and social aspects together with design planning factory automation and artificial intelligent systems This volume of proceedings brings together 10 keynote and invited speaker addresses and over 180 papers by practitioners from 28 countries It documents current research and in depth studies on the fundamental aspects of advanced CIM systems and their practical applications The papers fall into 3 main sections CIM Related Issues Industrial AI Applications Aspects and Concurrent Engineering Advanced Design Simulation and Flexible Manufacturing Systems

COMPUTER INTEGRATED MANUFACTURING ALAVUDEEN, A., VENKATESHWARAN, N., 2008-08-18 This up to date and accessible text deals with the basics of Computer Integrated Manufacturing CIM and the many advances made in the field It begins with a discussion on automation systems and gives the historical background of many of the automation technologies Then it moves on to describe the various techniques of automation such as group technology and flexible manufacturing systems The text describes several production techniques for example just in time JIT lean manufacturing and agile manufacturing besides explaining in detail database systems machine functions and design considerations of Numerical Control NC and Computer Numerical Control CNC machines and

how the CIM system can be modelled The book concludes with a discussion on the industrial application of artificial intelligence with the help of case studies in addition to giving network application and signalling approaches Intended primarily as a text for the undergraduate and graduate students of mechanical production and industrial engineering and management the text should also prove useful for the professionals in the field

*Design and Analysis of Integrated Manufacturing Systems* W. Dale Compton, 1988-02-01 *Design and Analysis of Integrated Manufacturing Systems* is a fresh look at manufacturing from a systems point of view This collection of papers from a symposium sponsored by the National Academy of Engineering explores the need for new technologies the more effective use of new tools of analysis and the improved integration of all elements of manufacturing operations including machines information and humans It is one of the few volumes to include detailed proposals for research that match the needs of industry

*Principles of Computer-integrated Manufacturing* S. Kant Vajpayee, 1995 For courses in Computer Integrated Manufacturing CAD CAM Innovations in Technology and Advances in Manufacturing For Community College students or 4 year college students A unique new text whose emphasis on the underlying principles of Computer Integrated Manufacturing CIM creates a treatment that is effectively balanced between the needs of the technologist and management considerations of CIM After an introduction to the basics of CIM coverage addresses its three enabling technologies computers communications and databases Metals and Alloys followed by discussion of CIM technologies for discrete parts production A final chapter looks at emerging technologies and management innovations and their impact on the field
