**India's Cybersecurity Policy** Thangjam K. Singh, 2024-06-07 This book examines India's public policies on cybersecurity and their evolution over the past few decades. It shows how threats and vulnerabilities in the domain have forced nation states to introduce new policies to protect digital ecosystems. It charts the process of securitisation of cyberspace by the international system from the end of the 20th century to the present day. It also explores how the domain has become of strategic interest for many states and the international bodies which eventually developed norms and policies to secure the domain. Consequently, the book discusses the evolution of cybersecurity policy at global level by great powers, middle powers and states of concern and compares them with the Indian context. It also highlights the requirement of introducing/improving new cybersecurity guidelines to efficiently deal with emerging technologies such as 5G, Artificial Intelligence, AI, Big Data, BD, Blockchain, Internet of Things (IoT) and cryptocurrency. The book will be of great interest to scholars and researchers of cybersecurity, public policy, politics and South Asian studies.

*Awakening to China's Rise* Hugo Meijer, 2022-08-01 *Awakening to China's Rise* provides the most comprehensive analysis to date of how Europe's major powers have responded to the re-emergence of China as a great power in world politics since the end of the Cold War. To do so, it puts forward a unique cross-regional comparison of how the major European powers, France, Germany and the United Kingdom have confronted Chinese assertiveness both in the Asia Pacific and in Europe. Firstly, it analyses their response to China's increasingly muscular regional posture in the Asia Pacific through the development of diplomatic and security initiatives with partners in the region. Secondly, it delineates how they have confronted China's inroads into Europe, looking at the measures that they have taken to tackle Chinese investments in and supply of technologies in strategic sectors such as critical national infrastructures, dual-use technologies and in the digital domain, including Huawei's 5G networks. A longstanding assumption in the IR literature has been that European foreign policies toward the People's Republic of China have been driven by a naive and self-interested focus on the economic opportunities presented by such a vast market, overlooking security considerations. This book challenges such common belief through a detailed examination of the policies of France, Germany and the United Kingdom from 1989 to the present. Its central argument is that, whereas this assessment aptly characterized the first two post-Cold War decades, Beijing's growing assertiveness after 2009 caused the three major European powers to awaken to China's rise. In the 2010s, heightened threat perceptions of China, coupled with increasingly competitive bilateral economic relations with the PRC, have gradually and cumulatively caused the hardening of their policy goals, which in turn translated into the formulation of new policy instruments to confront such a challenge. To substantiate this argument, the book relies on a large body of previously undisclosed primary sources, including 223 interviews conducted with senior officials in Europe (Berlin, Brussels, London, Paris) and in the United States (Washington DC) and in Asia (Beijing, Shanghai, New Delhi, Seoul), declassified archival documents from France, the UK and Germany, leaked US diplomatic cables and new
