The Privacy Fix Robert H. Sloan, Richard Warner,2021-10-21 Online surveillance of our behavior by private companies is on the increase particularly

through the Internet of Things and the increasing use of algorithmic decision making This troubling trend undermines privacy and increasingly threatens our ability to control how information about us is shared and used Written by a computer scientist and a legal scholar The Privacy Fix proposes a set of evidence based practical solutions that will help solve this problem Requiring no technical or legal expertise the book explains complicated concepts in clear straightforward language Bridging the gap between computer scientists economists lawyers and public policy makers this book provides theoretically and practically sound public policy guidance about how to preserve privacy in the onslaught of surveillance It emphasizes the need to make tradeoffs among the complex concerns that arise and it outlines a practical norm creation process to do so

Strategic Culture, Securitisation and the Use of Force Wilhelm Mirow, 2016-04-14 This book investigates and explains the extent to which different liberal democracies have resorted to the use of force since the 9 11 terrorist attacks The responses of democratic states throughout the world to the September 2001 terrorist attacks have varied greatly This book analyses the various factors that had an impact on decisions on the use of force by governments of liberal democratic states It seeks to explain differences in the security policies and practices of Australia Canada France Germany and the UK regarding the war in Afghanistan domestic counterterrorism measures and the Iraq War To this end the book combines the concepts of strategic culture and securitisation into a theoretical model that disentangles the individual structural and agential causes of the use of force by the state and sequentially analyses the impact of each causal component on the other It argues that the norms of a strategic culture shape securitisation processes of different expressions which then bring about distinct modes of the use of force in individual security policy decisions While governments can also deviate from the constraints of a strategic culture this is likely to encounter a strong reaction from large parts of the population which in turn can lead to a long term change in strategic culture This book will be of much interest to students of strategic culture securitisation European politics security studies and IR in general [Research Handbook on International Law and Cyberspace](#) Tsagourias,

Nicholas, Buchan, Russell, 2021-12-14 This revised and expanded edition of the Research Handbook on International Law and Cyberspace brings together leading scholars and practitioners to examine how international legal rules concepts and principles apply to cyberspace and the activities occurring within it In doing so contributors highlight the difficulties in applying international law to cyberspace assess the regulatory efficacy of these rules and where necessary suggest adjustments and revisions *In the Name of Security Secrecy, Surveillance and Journalism* Johan Lidberg, Denis

Muller, 2018-05-15 The terrorist attacks on the World Trade Center in New York on 11 September 2001 saw the start of the so called war on terror The aim of *In the Name of Security Secrecy Surveillance and Journalism* is to assess the impact of surveillance and other security measures on in depth public interest journalism How has the global fear driven security paradigm sparked by 11 September affected journalism At the core of the book sits what the authors have labeled the trust us dilemma Governments justify passing at times oppressive and far reaching anti terror laws to keep citizens safe from

terror By doing so governments are asking the public to trust their good intentions and the integrity of the security agencies But how can the public decide to trust the government and its agencies if it does not have access to information on which to base its decision In the Name of Security Secrecy Surveillance and Journalism takes an internationally comparative approach using case studies from the powerful intelligence sharing group known as the Five Eyes consisting of the US Canada the UK Australia and New Zealand Chapters assessing a selection of EU countries and some of the BRICS countries provide additional and important points of comparison to the English speaking countries that make up the Five Eyes
