Brown, 2008-01-17 How to build a more just world and save the planet. We should all heed Brown's advice. Bill Clinton. In this updated edition of the landmark *Plan B*, Lester Brown outlines a survival strategy for our early twenty-first century civilization. The world faces many environmental trends of disruption and decline, including rising temperatures and spreading water shortage. In addition to these looming threats, we face the peaking of oil, annual population growth of 70 million, a widening global economic divide, and a growing list of failing states. The scale and complexity of issues facing our fast-forward world have no precedent. With *Plan A*, business as usual, we have neglected these issues over a long time. In *Plan B 3.0*, Lester R. Brown warns that the only effective response now is a World War II type mobilization, like that in the United States after the attack on Pearl Harbor. **Metro**, 2008 **Plan B 3.0: Mobilizing to Save Civilization** Lester R. Brown, **TWENTY-FIRST CENTURY'S FUEL SUFFICIENCY ROADMAP** STEVE ESOMBA, Dr., 2012-06-06 We badly need new sources of clean energy to generate electricity, heat, and power our industries, homes, and workplaces. Up to now, we have relied on and used only fossil fuels to power our industrial

and domestic activities The byproducts of fossil fuels include irreversible pollution and contamination of our Earth climate change global warming and increase in pathogenic and medication resistant diseases Exhaustible fossil fuels are expensive to produce and distribute and not everybody can afford them Why not switch to natural non polluting inexpensive inexhaustible fuels such as solar wind water etc fuels This is the timely message contained in TWENTY FIRST CENTURY S FUEL
