Vocational Education and Training in Times of Economic Crisis Matthias Pilz, 2016-12-20 This book brings together a broad range of approaches and methodologies relevant to international comparative vocational education and training VET Revealing how youth in transition is affected by economic crises it provides essential insights into the strengths and weaknesses of the various systems and prospects of VET in contexts ranging from North America to Europe e.g Spain Germany or the UK to Asia such as China Thailand and India Though each country examined in this volume is affected by the economic crisis in a different way the effects are especially apparent for the young generation In many countries the youth unemployment rate is still very high and the job perspectives for young people are often limited at best The contributions in this volume demonstrate that VET alone cannot solve these problems but can be used to support a smooth transition from school to work If the quality of VET is high and the status and job expectations are good VET can help to fill the skills gap especially at the intermediate skill level Furthermore VET can also offer a realistic alternative to the university track for young people in many countries
