

# CHAPTER 1

## INTRODUCTION TO ECONOMICS

### Introduction to Economics

a social science directed at the satisfaction of needs and wants through the allocation of scarce resources which have alternative uses

- We can go further to state that
- economics is about the study of *scarcity and choice*
- economics finds ways of reconciling *unlimited wants with limited resources*

\* *economics explains the problems of living in communities in terms of the underlying resource costs and consumer benefits*

#### Costs and Benefits of Economic Growth

##### Benefits

- Reduction in illiteracy
- Reduction in poverty

##### Costs

- Environmental pollution
- Breakdown of the family

# Chapter 8 Forestry I Introduction Economics

**Donald L. Grebner, Pete  
Bettinger, Jacek P. Siry, Kevin Boston**

## Chapter 8 Forestry I Introduction Economics:

**Introduction to Environmental Economics** Nick Hanley, Jason Shogren, Ben White, Benedict White, 2013-01-31 Part one explains the fundamental economic concepts

Forest Economics Daowei Zhang, Peter H. Pearse, 2011-09-15 Forestry cannot be isolated from the forces that drive all economic activity It involves using land labour and capital to produce goods and services from forests while economics helps in understanding how this can be done in ways that will best meet the needs of people Therefore a firm grounding in economics is integral to sound forestry policies and practices This book a major revision and expansion of Peter H Pearse s 1990 classic provides this grounding Updated and enhanced with advanced empirical presentation of materials it covers the basic economic principles and concepts and their application to modern forest management and policy issues Forest Economics draws on the strengths of two of the field s leading practitioners who have more than fifty years of combined experience in teaching forest economics in the United States and Canada Its comprehensive and systematic analysis of forest issues makes it an indispensable resource for students and practitioners of forest management natural resource conservation and environmental studies

**Economics of Forestry**, 1965 This bibliography lists publications and postgraduate theses in the field of forestry economics in the United States and Canada in 1960 1961 and 1962

**Introduction to Forestry and Natural Resources** Donald L. Grebner, Pete Bettinger, Jacek P. Siry, Kevin Boston, 2021-01-19 Introduction to Forestry and Natural Resources Second Edition presents a broad completely updated overview of the profession of forestry The book details several key fields within forestry including forest management economics policy utilization and forestry careers Chapters deal specifically with forest regions of the world landowners forest products wildlife habitats tree anatomy and physiology and forest disturbances and health These topics are ideal for undergraduate introductory courses and include numerous examples and questions for students to ponder There is also a section dedicated to forestry careers Unlike other introductory forestry texts which focus largely on forest ecology rather than practical forestry concepts this book encompasses the economic ecological and social aspects thus providing a uniquely balanced text The wide range of experience of the contributing authors equips them especially well to identify missing content from other texts in the area and address topics currently covered in corresponding college courses Covers the application of forestry and natural resources around the world with a focus on practical applications and graphical examples Describes basic techniques for measuring and evaluating forest resources and natural resources including fundamental terminology and concepts Includes management policies and their influence at the local national and international levels

Introduction to the Study of Modern Forest Economy John Croumbie Brown, 1884

**Fremont National Forest (N.F.), Land and Resource(s) Management Plan (LRMP)**, 1989

Governing Africa's Forests in a Globalized World Laura A. German, Anne-Marie Tiani, Alain Karsenty, 2009-12 Many countries around the world are engaged in decentralization processes and most African countries face serious problems with forest governance from benefits sharing

to illegality and sustainable forest management This book summarizes experiences to date on the extent and nature of decentralization and its outcomes most of which suggest an underperformance of governance reforms and explores the viability of different governance instruments in the context of weak governance and expanding commercial pressures over forests Findings are grouped into two thematic areas decentralization livelihoods and sustainable forest management and international trade finance and forest sector governance reforms The authors examine diverse forces shaping the forest sector including the theory and practice of decentralization usurpation of authority corruption and illegality inequitable patterns of benefits capture and expansion of international trade in timber and carbon credits and discuss related outcomes on livelihoods forest condition and equity The book builds on earlier volumes exploring different dimensions of decentralization and perspectives from other world regions and distills dimensions of forest governance that are both unique to Africa and representative of broader global patterns Authors ground their analysis in relevant theory while attempting to distill implications of their findings for policy and practice

*Forestry and the Nigerian Economy* S. Kolade Adeyoju, 1975  
*Economics of Natural Resources Management*, 2002

**Economic Assessment of Mangrove Forest Uses** Cho Cho San, 2018-04-04

Mangrove forests are among the most sensitive and also the most threatened ecosystems on Earth At the same time nearly all of them are located in regions where food security is fragile and smallholder families are desperate to find additional sources of income As a result the local population views them as a resource for enhancing their livelihoods and as there are significant differences between the private profitability of converting mangroves into farm land and the social cost benefit balance of such actions conflicts between the protection of mangrove forests on the one hand and their use for agricultural production on the other hand are prevalent This study was conducted to estimate the economic value of the Wunbaike Mangrove and to evaluate the benefits of the alternative mangrove uses from the private and social point of view to assist in the improvement of mangrove management strategies and policies The study focused on the Wunbaike Mangrove users in the Yanbye Township The economic value of mangroves was estimated in terms of local direct use of mangrove forest products and users willingness to pay for the conservation of mangroves for its non use value Financial and economic cost benefit analyses were conducted to evaluate the rice and shrimp farms in the mangroves

*The Economics of Forest Disturbances* Thomas P. Holmes, Jeffrey P. Prestemon, Karen L. Abt, 2008-04-18 by Peter J Roussopoulos Director Southern Research Station

The world and its ecosystems are repeatedly punctuated by natural disturbances and human societies must learn to manage this reality Often severe and unpredictable dynamic natural forces disrupt human welfare and alter the structure and composition of natural systems Over the past century land management agencies within the United States have relied on science to improve the sustainable management of natural resources Forest economics research can help advance this scientific basis by integrating knowledge of forest disturbance processes with their economic causes and consequences As the twenty first century unfolds people increasingly seek the goods and services provided by forest ecosystems not only for

wood supply clean water and leisure pursuits but also to establish residential communities that are removed from the hustle and bustle of urban life As vividly demonstrated during the past few years Santa Ana winds can blow wildfires down from the mountains of California incinerating homes as readily as vegetation in the canyons below Hurricanes can fatten large swaths of forest land while associated floods create havoc for urban and rural residents alike Less dramatic but more insidious trees and forest stands are succumbing to exotic insects and diseases causing economic losses to private property values including timber as well as scenic and recreation values As human demands on public and private forests expand science based solutions need to be identified so that social needs can be balanced with the vagaries of forest disturbance processes

**Forestry Economics** John E. Wagner, 2023-12-22 Forestry Economics introduces students and practitioners to the economics of managing forests and forest enterprises The book adopts the approach of managerial economics textbooks and applies this to the unique problems and production processes faced by managers of forests and forest enterprises What many future forest and natural resource managers need is to understand what economic information is and how to use it to make better business and management decisions John E Wagner draws on his 30 years of experience teaching and working in the field of forest resource economics to present students with an accessible understanding of the unique production processes and problems faced by forest and other natural resource managers The second edition has been updated to include Expanded discussion of compounding discounting and capital budgeting as well as an expanded discussion of when to replace a capital asset that has i costs but no direct revenue stream such as a machine ii costs and a direct annual revenue stream such as a solar array or iii costs and a periodic revenue stream illustrated by the forest rotation problem New practical examples to provide students with applications of the concepts being discussed in the text most notably on New Zealand and a Radiata Pine *Pinus radiata* Plantation A brand new chapter that develops business plans for for profit businesses to illustrate how a business plan is derived from the economic information contained within the Architectural Plan for Profit and how it can be used to make business decisions about continuing to operate a business or to start a new business This textbook is an invaluable source of clear and accessible information on forestry economics and management not only for economics students but also for students of other disciplines and those already working in forestry and natural resources *First Development Plan (1970-74)*. North Central State (Nigeria). Economic Planning Division, 1970 [Sustainable Energy and Economics in an Aging Population](#) Kozo Torasan Mayumi, 2020-04-01 This book discusses current challenges in Japan focusing on the nation's rapidly aging population and low birth rate along with persistent public bond issues with heavy interest payments the potential collapse of social security systems and income inequality as well as the global picture In turn it examines the accessibility of global fossil fuels and feasibility of large scale solar energy use A new theory of money interest and capital is put forward together with a proposal for an alternative system of international monetary cooperation to promote a more sustainable and equitable world Specific topics discussed include the inverted population pyramid due to

the dramatic change in human life spans and declining birth rates the rapidly shrinking workforce aging population and declining GDP share sourced from industry disproportionate debt expansion due to public bond issues and coping with a persistent budget deficit the potential collapse of social security systems combined with income inequality and how to mitigate these bio economic predicaments Global Energy Sources offers an essential guide for policymakers economists researchers and all those concerned with establishing a sustainable and equitable society from both energy and monetary perspectives Further it will be of interest to readers around the world as the lessons learned from Japan are crucial to other developed societies that may eventually face the same types of challenge
