Child And Adolescent Development A Behavioral Systems Approach:

Child and Adolescent Development Gary Novak, 2004 Child and Adolescent Development A Behavioral Systems Approach integrates the views of dynamical systems concepts with a behavioral view of development This combination of perspectives is unique and from it something new emerges a behavioral systems approach to development It is an approach that incorporates both personal and environmental influences and the constant reciprocal interactions between nature and nurture The book emphasizes learning as the major process for change in development and the integration of environmental influences with genetic and historical factors Authors Gary Novak and Martha Pelaez provide a coherent understanding of the learning process in childhood and adolescence and present successful interventions to minimize typical problematic behavior during this period *Child Development* Gary Novak, Martha B. advances requires monitoring diverse resources limited to specific disorders many of which give short shrift to child assessment overlooking developmental considerations Much of the existing literature is either theoretical research in focus or clinical in nature Nowhere are the various aspects of child behavioral assessment placed in a comprehensive research clinical context nor is there much integration as to conceptualization and treatment planning The Clinician s Handbook of Child Behavioral Assessment was created to fill this gap summarizing critical information for child behavioral assessment in a single source The Clinician s Handbook of Child Behavioral Assessment provides a single source for understanding new developments in this field cutting across strategies techniques and disorders Assessment strategies are presented in context with the research behind those strategies along with discussions of clinical utility and how assessment and conceptualization fit in with treatment planning The volume is organized in three sections beginning with general issues followed by evaluations of specific disorders and problems and closing with special issues To ensure cross chapter consistency in the coverage of disorders these chapters are formatted to contain an introduction assessment strategies research basis clinical utility conceptualization and treatment planning a case study and summary Special issue coverage includes child abuse assessment classroom assessment behavioral neuropsychology academic skills problems and ethical legal issues Suitable for beginning and established clinicians in practice this handbook will provide a ready reference toward effective child behavioral assessment
