Information Theory and Coding - Solved Problems Predrag Ivaniš, Dušan Drajić, 2016-11-29 This book offers a comprehensive overview of information theory and error control coding using a different approach than in existing literature. The chapters are organized according to the Shannon system model where one block affects the others. A relatively brief theoretical introduction is provided at the beginning of every chapter including a few additional examples and explanations but without any proofs. And a short overview of some aspects of abstract algebra is given at the end of the corresponding chapters. The characteristic complex examples with a lot of illustrations and tables are chosen to provide detailed insights into the nature of the problem. Some limiting cases are presented to illustrate the connections with the theoretical bounds. The numerical values are carefully selected to provide in-depth explanations of the described algorithms. Although the examples in the different chapters can be considered separately they are mutually connected and the conclusions for one considered problem relate to the others in the book. **Mathematical Reviews**, 2005 Proceedings, ... Information Theory, Coding and Cryptography Arijit Saha, Nilotpal Manna, Surajit Mandal, 2013 Information Theory Coding Cryptography has been designed as a comprehensive book for the students of engineering discussing Source Encoding Error Control Codes Cryptography. The book contains the recent developments of coded modulation trellises for codes turbo coding for reliable data and interleaving. The text balances the mathematical rigor with an exhaustive amount of solved and unsolved questions along with a database of MCQs. *IETE Technical Review*, 1995 **Dissertation Abstracts International**, 2008 *Proceedings of the ...
