**Advances in Civil Engineering Materials** Elham Maghsoudi Nia, Mokhtar Awang, 2024-07-05 This book showcases the latest research in civil engineering and architectural materials with a specific focus on the following key areas: circularity, energy retrofitting, building materials, structural advancements, and transportation innovations. The research findings and advancements presented in this book are a part of the 7th International Conference on Architecture and Civil Engineering (ICACE 2023) held on 15 November 2023 at the Everly Hotel Putrajaya, Malaysia. This conference serves as a prominent platform for researchers, professionals, and industry experts to exchange knowledge and ideas in order to advance the fields of civil engineering and architecture. *Advances in Civil Engineering Materials* Mokhtar Awang, Lloyd Ling, Seyed Sattar Emamian, 2022-03-01 This book presents selected articles from the 4th International Conference on Architecture and Civil Engineering 2021 held in Malaysia. Written by leading researchers and industry professionals, the papers highlight recent advances and address current issues in the fields of civil engineering and architecture. *Advances in Civil Engineering Materials* Ar Meor Mohammad Fared Bin Meor Razali, Mokhtar Awang, Seyed Sattar Emamian, 2021-04-29 This book presents selected articles from the 4th International Conference on Architecture and Civil Engineering 2020 held in Kuala Lumpur, Malaysia. Written by leading researchers and industry professionals, the papers highlight recent advances and address the current issues in the fields of civil engineering and architecture. *Green Engineering Materials* Yuli Panca Asmara, 2025-05-13 The use of green engineering materials represents a promising approach to sustainable development. This book explores various renewable materials and their properties, applications, and technological advancements driving their use in modern engineering and construction. This book highlights the significance of green engineering materials in sustainable development and explains their effective use in engineering and construction. It covers bamboo as a rapidly growing renewable material in use with significant engineering potential, detailing its unique characteristics, preservation methods, and uses in construction. The book also investigates sustainable plant-based composites, focusing on biopolymer and biomass matrices, cellulose-based materials, lignin, polylactic acid, and natural rubber. It highlights the benefits of plant fibres like rice husk ash and jute while addressing the challenges in adopting these composites in engineering. Green concrete technologies like hybrid geopolymers and green additives and their manufacturing processes are also discussed. Following this, the book discusses bio-based adhesives and then explores the industrial potential of rice husk ash in applications including electronic devices, composites, and reinforced concrete. Palm oil and coconut shells are also examined as versatile renewable resources for various construction and development applications. Finally, the book emphasizes the importance of wood in construction, including its properties, treatment methods, and future trends in sustainable construction practices. Because this has a broad scope and provides readers with a basic level of technical knowledge, it is an ideal guide for general readers concerned with sustainability as well as anyone starting out in the field, including undergraduate students and

readers in the industry who want to keep abreast of current developments and trends in this field      **Integrative Oncology**
