Student Exploration: Natural Selection

Background: Biological evolution, the change in the heritable characteristics of biological populations over successive generations, occurs through mechanisms such as natural selection.

Key Knowledge: Organisms have different traits that help them survive in their environment.

The **organism's traits** (physical features) are a combination of genes inherited from both parents. A trait is a characteristic that is passed on from one generation to the next through genes. Some traits are helpful, some are harmful, and some are neutral.

1. Which trait(s) do you think would be passed on to the next generation?

Darkness color? **Yes, because it is a survival trait.**

2. Which trait(s) do you think would be passed on to the next generation?

Light color? **Yes, because it is a survival trait.**

Key Information:

Organisms have different traits that help them survive in their environment. Some traits are helpful, some are harmful, and some are neutral. Organisms with helpful traits are more likely to survive and reproduce. Organisms with harmful traits are less likely to survive and reproduce. Organisms with neutral traits are not affected by natural selection.

Some traits are passed on to the next generation.

1. Which trait(s) do you think would be passed on to the next generation?

2. Which trait(s) do you think would be passed on to the next generation?

3. Which trait(s) do you think would be passed on to the next generation?

4. **Background:** Organisms with helpful traits are more likely to survive and reproduce.

Organisms with harmful traits are less likely to survive and reproduce. Organisms with neutral traits are not affected by natural selection.
